### Description

Introducing the new Gantom One Up, the ultimate solution for lighting designers who want to pack a powerful punch in a small package. Building off the success of the Gantom One, the One Up brings four-color output to this LED pin spot and delivers a tight and punchy beam that produces homogeneous color mixing, even at close distances. Featuring a native 4.5 degree beam angle, the Gantom One Up includes 4 diffusion filters, hex louver, and optional top hat, half hat, and angled cowlings for easy control over the beam. Its native DMX control and balanced dimming curve make it perfect for even the most demanding of lighting designers.

Whether you're illuminating a small space or a large venue, the Gantom One Up has everything you need to create stunning lighting designs.
