LightScene EV-100/105 User's Guide

Welcome to the LightScene EV-100/105 *User's Guide*.

For a printable PDF copy of this guide, [click here](#).

Introduction to Your Projector

Refer to these sections to learn more about your projector and this manual.

[Projector Features](#)

[Notations Used in the Documentation](#)

[Where to Go for Additional Information](#)

[Additional Projector Software and Manuals](#)

[Projector Part Locations](#)

Projector Features

The LightScene EV-100/105 projector includes these special features:

Bright, high-resolution projection system

- Up to 2000 lumens of color brightness (color light output) and white brightness (white light output)

Note: Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

- Native resolution of 1280 × 800 pixels (WXGA)

Flexible connectivity

- HDMI port for computer or video device connection
- Wired and wireless network support for projection, monitoring, and control via remote network computer
- Use Epson iProjection (Windows/Mac) to simultaneously project up to four images from network computers or mobile devices using the Epson iProjection app
- Projection from iOS or Android devices with the free Epson iProjection app; visit epson.com/iprojection (U.S.) or epson.ca/iprojection (Canada) for more information
- Audio out port for connecting external speakers

Innovative display and operation features

- Long-life laser light source
- Spotlight design with 360-degree horizontal rotation for flexible display and mounting options
- Epson's quick-connect on-screen QR code feature for easy wireless setup

- High digital zoom ratio for larger images in shorter projection distances
- 2,500,000:1 contrast ratio and Dynamic Contrast control for sharp, detailed images
- Epson's Direct Power On and Auto Power On features for quick and easy setup
- Support for Crestron Connected network monitoring systems
- Network message broadcast system to project timely messages to all networked projectors

[Product Box Contents](#)

[Additional Components](#)

[Optional Equipment and Replacement Parts](#)

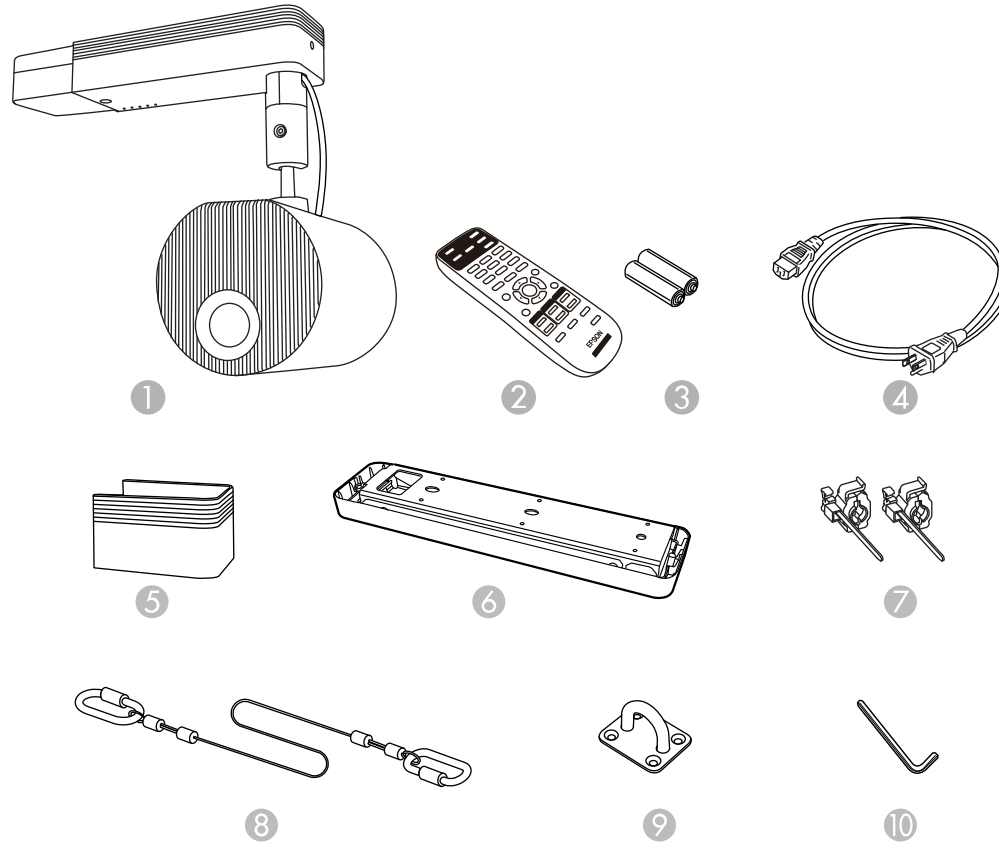

[Warranty and Registration Information](#)

Parent topic: [Introduction to Your Projector](#)

Product Box Contents

Save all the packaging in case you need to ship the projector. Always use the original packaging (or equivalent) when shipping.

Make sure your projector box included all of these parts:

- 1 Projector
- 2 Remote control
- 3 Remote control batteries (2 AA alkaline)
- 4 Power cord
- 5 Cable cover
- 6 Direct mount

- 7 Cable clips
- 8 Safety wire
- 9 Wire hook mount
- 10 Hex wrench

Parent topic: [Projector Features](#)

Additional Components

Depending on how you plan to use the projector, you may need to obtain additional components.

Note: To connect a Mac that does not include a compatible video output port, you need to obtain an adapter that allows you to connect to an input port on the projector. Contact Apple for compatible adapter options. To connect a smartphone or tablet, you may need to obtain an adapter that allows you to connect to the projector. This allows you to mirror your smartphone or tablet screens, watch movies, and more. Contact your device manufacturer for compatible adapter options.

Unless listed as available from Epson in this table, see your local computer or electronics dealer for purchase information.

Signal or connection type	Additional component necessary
HDMI	Compatible HDMI cable Available for purchase from Epson or an authorized Epson reseller. Note: Older Mac computers (2009 and earlier) may not support HDMI audio.
Audio out	Commercially available 3.5 mm mini jack stereo cable
USB	Compatible USB cable (for 1200 mA power supply connection only)

Parent topic: [Projector Features](#)

Optional Equipment and Replacement Parts

You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

Epson offers the following optional accessories and replacement parts for your projector:

Option or part	Part number
Lighting track mount (white)	ELPMB54W
Lighting track mount (black)	ELPMB54B
Floor stand (white)	ELPMB55W
Floor stand (black)	ELPMB55B

In addition to the accessories listed above, 1-year and 2-year extended service plans are available.

Parent topic: [Projector Features](#)

Warranty and Registration Information

Your projector comes with a basic warranty that lets you project with confidence. For details, see the warranty that came with your projector.

In addition, Epson offers free Extra Care Road Service. In the unlikely event of an equipment failure, you won't have to wait for your unit to be repaired. Instead, Epson will ship you a replacement unit anywhere in the United States, Canada, or Puerto Rico. See the Extra Care Road Service brochure for details.

Register your product online at this site: epson.com/webreg.

Registering also lets you receive special updates on new accessories, products, and services.

Parent topic: [Projector Features](#)

Notations Used in the Documentation

Follow the guidelines in these notations as you read your documentation:

- **Warnings** must be followed carefully to avoid bodily injury.
- **Cautions** must be observed to avoid damage to your equipment.
- **Notes** contain important information about your projector.
- **Tips** contain additional projection information.

Parent topic: [Introduction to Your Projector](#)

Where to Go for Additional Information

Need quick help on using your projector? Here's where to look for help:

- epson.com/support (U.S.) or epson.ca/support (Canada)

View FAQs (frequently asked questions) and e-mail your questions to Epson technical support 24 hours a day.

- If you still need help after checking this manual and any other sources listed here, you can use the Epson PrivateLine Support service to get help fast. For details, see "Where to Get Help."

[Where to Get Help](#)

Additional Projector Software and Manuals

After connecting and setting up the projector, install the projector software from the included software CD or, if you don't have a CD, download the software and manuals as necessary.

You can install the projector software programs listed here and view their manuals for instructions on using them.

Note: If you still need help after checking this manual and the sources listed here, you can use the Epson PrivateLine Support service to get help fast. For details, see "Where to Get Help."

Projector software	Manual	Description
Epson Projector Management (Windows only)	<i>Epson Projector Management Operation Guide</i>	Lets you monitor and control your projector through the network. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.
Epson iProjection (Windows/Mac)	<i>Epson iProjection Operation Guide (Windows/Mac)</i>	Lets you project the computer screens of users over a network. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.

Projector software	Manual	Description
EasyMP Network Updater (Windows only)	<i>EasyMP Network Updater Operation Guide</i>	Lets you update firmware for a projector over a wired LAN. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.
Epson iProjection app	Instructions are included with the app	Lets you project from an iOS device, Android device, or Chromebook if your projector is connected to a network that includes a wireless access point. Visit epson.com/iprojection (U.S.) or epson.ca/iprojection (Canada) for more information.
—	<i>Open Source Software License</i>	You can download this document from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.
Epson Projector Content Manager	<i>Epson Projector Content Manager Operation Guide</i>	Lets you add images and movies to playlists, and save them on an SD card; insert the SD card into the projector to project your playlist content without using a cable connection. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.

Setting Up the Projector

Follow the instructions in these sections to set up your projector for use.

[Projector Placement](#)

[Attaching and Removing the Cable Clips](#)

[Connecting to a Computer for HDMI Video and Audio](#)

[Connecting to an HDMI Video Source](#)

[Connecting to External Speakers](#)

[Inserting an SD Card](#)

[Installing Batteries in the Remote Control](#)

Projector Placement

Your projector is designed to be installed on a wall or ceiling (with the included mount).

You can also place the projector on almost any flat surface (with the optional floor stand) to project an image in a portable setup, or on a lighting track (with the optional lighting track mount).

Keep these considerations in mind as you select a projector location:

- Follow the instructions in the *Installation Guide* to install the projector on a wall or ceiling.
- If installing on a lighting track, use only the optional lighting track mount (ELPMB54).
- If the projector is not mounted, place it on a sturdy, level surface using the optional floor stand (ELPMB55).
- Leave plenty of space around and under the projector for ventilation, and do not place it on top of or next to anything that could block the vents.
- Position the projector within reach of a grounded electrical outlet or extension cord.

[Projector Setup and Installation Options](#)

[Projection Distance](#)

Parent topic: [Setting Up the Projector](#)

Related references

[Optional Equipment and Replacement Parts](#)

Projector Setup and Installation Options

You can set up or install your projector in the following ways:

Mounted on a ceiling or lighting track

Mounted on a wall

Placed on the floor or on a table or portable cart

Note: Use the direct mount (included) only for mounting the projector on a wall or ceiling. If installing on a lighting track, use only the optional lighting track mount (ELPMB54). If you do not mount the projector, use only the optional floor stand (ELPMB55).

Note: Be sure to leave at least the following amount of space around the projector to avoid blocking the air exhaust and intake vents.

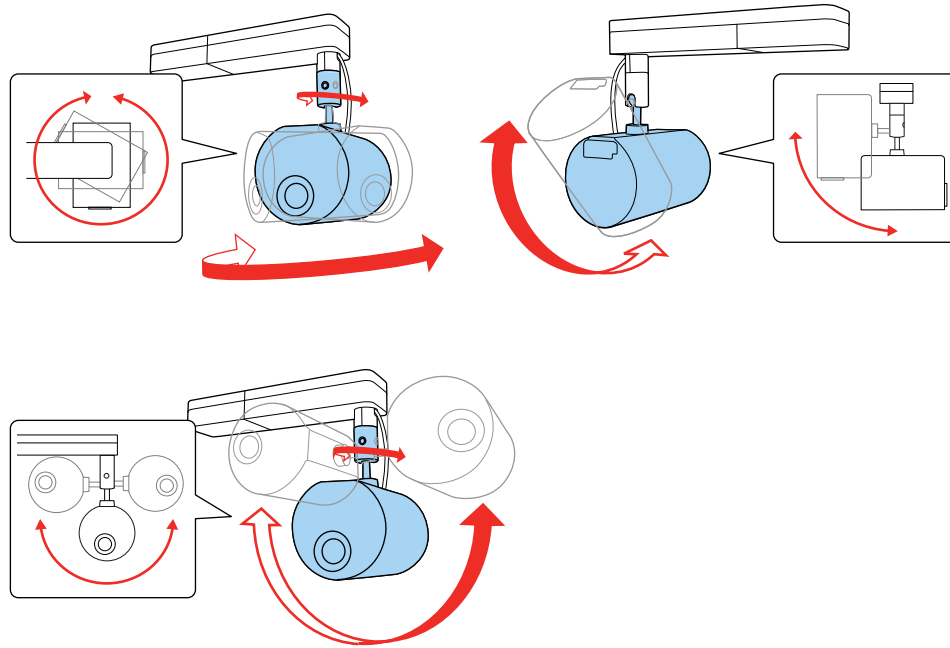

- 1 11.8 inches (30 cm)
- 2 7.8 inches (20 cm)

If you are installing multiple projectors next to each other, be sure to leave at least 20 inches (50 cm) of space between the projectors. Also make sure heated air from an exhaust vent does not go into the air intake vent of another projector.

You can rotate the projection unit 360 degrees horizontally and 90 degrees vertically. You can also tilt the image 90 degrees in either direction.

Make sure to select the correct **Projection** setting in the Extended menu.

[Adjusting the Projection Angle](#)

Parent topic: [Projector Placement](#)

Adjusting the Projection Angle

You can adjust the projection angle using the ball joint on the projection unit.

1. Turn the projector on.

2. Loosen the ball joint screw using the supplied hexagonal wrench. Make sure to support the projection unit while loosening the screw so that it does not move suddenly.

Warning: Do not grip the ball joint with your fingers while loosening the screw or your fingers could get pinched.

3. Tilt the projection unit to adjust the projection angle.

Caution: Make sure the cables do not tangle around the ball joint or you may damage the projector.

4. When you finish, tighten the ball joint screw using the supplied hexagonal wrench. Make sure to support the projection unit so that it does not move.

Caution: Do not force the ball joint to move after tightening the ball joint screw or you may damage the projector.

Parent topic: [Projector Setup and Installation Options](#)

Projection Distance

The distance at which you place the projector from the screen determines the approximate size of the image. The image size increases the farther the projector is from the screen, but can vary depending on the zoom factor, aspect ratio, and other settings.

Refer to the tables in the *Installation Guide* to determine approximately how far to place the projector from the screen based on the size of the projected image. (Conversion figures may have been rounded up or down.) You can also use the Projection Distance Calculator [here](#) (U.S.), [here](#) (Canada), or [here](#) (Caribbean).

Parent topic: [Projector Placement](#)

Attaching and Removing the Cable Clips

You can install the cable clips that came with your projector to provide additional support to the power cord and HDMI cable.

1. Connect the power cord and HDMI cable to the projector.
2. Insert the end of each cable clip anchor into the cable clip slot above the power inlet and **HDMI** port as shown.

- 1 Cable clip slot
- 2 Cable clip anchor
- 3 Power cable clip
- 4 HDMI cable clip

3. Place the open cable clips around the power cord and HDMI cable, but do not lock them.
4. Slide each cable clip onto the anchors and lock the clips onto the power and HDMI anchors as shown.

To remove the cable clips, open the clips and disconnect the cables. Then pinch the sides of each cable clip anchor and carefully pull them out of the cable clip slots.

Parent topic: [Setting Up the Projector](#)

Connecting to a Computer for HDMI Video and Audio

If your computer has an HDMI port, you can connect it to the projector using an optional HDMI cable.

Note: To connect a Mac that does not include an HDMI video output port, you need to obtain an adapter that allows you to connect to the HDMI input port on the projector. Contact Apple for compatible adapter options. To connect a smartphone or tablet, you may need to obtain an adapter that allows you to connect to the HDMI input port on the projector. This allows you to mirror your smartphone or tablet screens, watch movies, and more. Contact your device manufacturer for compatible adapter options.

1. Connect the HDMI cable to your computer's HDMI output port.
2. Connect the other end to the projector's **HDMI** port.

Note: The projector converts the digital audio signal sent from your computer into a stereo analog signal if you are connecting to external speakers. (Make sure the HDMI audio playback device on your computer's audio settings is set to **EPSON PJ.**)

Parent topic: [Setting Up the Projector](#)

Connecting to an HDMI Video Source

If your video source has an HDMI port, you can connect it to the projector using an optional HDMI cable. The HDMI connection provides the best image quality.

1. Connect the HDMI cable to your video source's HDMI output port.
2. Connect the other end to the projector's **HDMI** port.

Note: The projector converts the digital audio signal sent from your video source into a stereo analog signal if you are connecting to external speakers.

Parent topic: [Setting Up the Projector](#)

Connecting to External Speakers

To play the sound from your presentation, you can connect the projector to external self-powered speakers. You can control the volume using the projector's remote control.

You can also connect the projector to an amplifier with speakers.

Warning: Do not connect headphones to the projector; the excessive sound pressure may damage your hearing.

1. Make sure your computer or video source is connected to the projector with an HDMI cable.
2. Locate the appropriate cable to connect your external speakers, such as a stereo mini-jack-to-pin-jack cable, or another type of cable or adapter.
3. Connect one end of the cable to your external speakers as necessary.

4. Connect the stereo mini-jack end of the cable to your projector's **Audio Out** port.

Parent topic: [Setting Up the Projector](#)

Related references

[Projector Setup Settings - Extended Menu](#)

Inserting an SD Card

Insert a commercially available SD card into the projector's SD card slot.

Note: An SD card is required to project from a playlist created using the Epson Projector Content Manager software.

Make sure you use an SDHC card of Class 10 or higher with a maximum capacity of 32GB, or an SD card formatted in FAT16 or FAT32.

Parent topic: [Setting Up the Projector](#)

Installing Batteries in the Remote Control

The remote control uses the two AA batteries that came with the projector.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Remove the battery cover.

2. Insert the batteries with the + and – ends facing as shown.

3. Replace the battery cover and press it down until it clicks into place.

Warning: Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

Parent topic: [Setting Up the Projector](#)

Using the Projector on a Network

Follow the instructions in these sections to set up your projector for use on a network.

[Wired Network Projection](#)

[Wireless Network Projection](#)

[Setting Up Projector Network E-Mail Alerts](#)

[Setting Up Monitoring Using SNMP](#)

[Controlling a Networked Projector Using a Web Browser](#)

[Using Crestron Connected](#)

[Art-Net Channel Definitions](#)

[Setting Up Web API](#)

[Registering a Digital Certificate on the Projector](#)

Wired Network Projection

You can project through a wired network. To do this, you connect the projector to your network with an Ethernet cable, and then set up your projector and computer for network projection.

After connecting and setting up the projector as described here, install the network software from the included CD or, if you don't have a CD, download the software and manuals as necessary.

Note: If your projector is connected via a LAN (Ethernet) cable to a network that includes a wireless access point, you can connect to the projector wirelessly through the access point using the Epson network software.

[Connecting to a Wired Network](#)

[Selecting Wired Network Settings](#)

Parent topic: [Using the Projector on a Network](#)

Related references

[Additional Projector Software and Manuals](#)

Connecting to a Wired Network

To connect the projector to a wired local area network (LAN), use a 100Base-TX or 10Base-T network cable. To ensure proper data transmission, use a Category 5 shielded cable or better.

1. Connect one end of the network cable to your network hub, switch, or router.

2. Connect the other end of the cable to the projector's **LAN** port.

Parent topic: [Wired Network Projection](#)

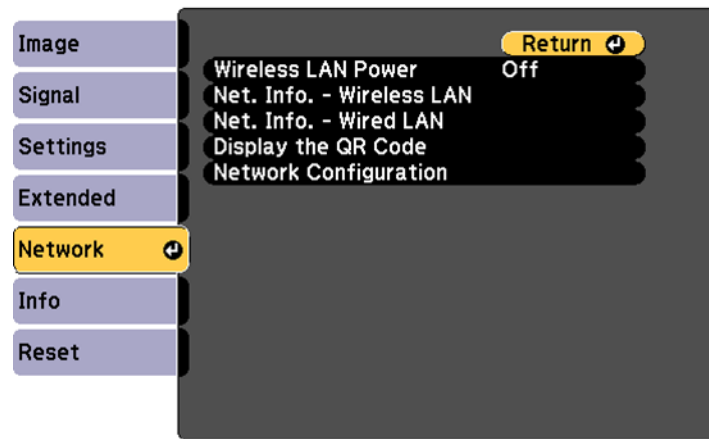

Selecting Wired Network Settings

Before you can project from computers on your network, you must select the network settings for the projector using its menu system.

Note: Make sure you already connected the projector to your wired network using the **LAN** port.

1. Turn on the projector.
2. Press the **Menu** button.

3. Select the **Network** menu and press **Enter** (↵).

4. Select **Network Configuration** and press **Enter** (↵).
5. Select the **Basic** menu and press **Enter** (↵).

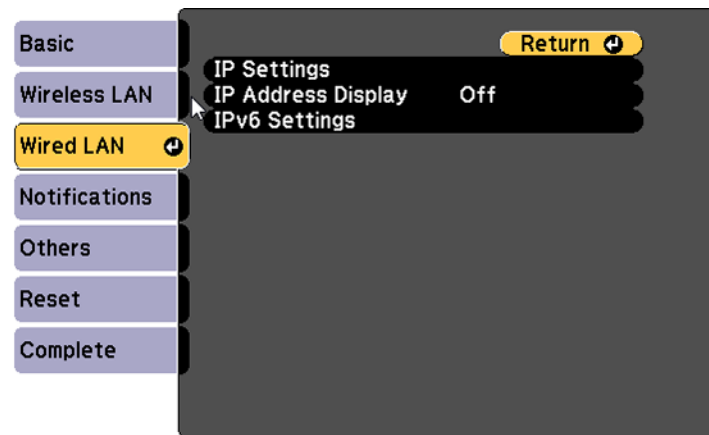

6. Select the following basic options as necessary:
 - **Projector Name** lets you enter a name up to 16 alphanumeric characters long to identify the projector over the network.

- **PJLink Password** lets you enter a password up to 32 alphanumeric characters long for using the PJLink protocol for projector control.
- **Web Control Password** lets you enter a password up to 8 alphanumeric characters long for accessing the projector over the web. (Default user name is **EPSONWEB**; default password is **admin**.)
- **Moderator Password** lets you enter a password up to 4 numbers long for accessing the projector as a moderator with the Epson iProjection (Windows/Mac) software or the Epson iProjection app. (No default password.)
- **Projector Keyword** lets you turn on a security password to prevent access to the projector by anyone not in the room with it. You must enter a displayed, randomized keyword from a computer using the Epson iProjection (Windows/Mac) software to access the projector.
- **Display Keyword** lets you select whether or not to display a projector keyword on the projected image when using the Epson iProjection (Windows/Mac) software to access the projector.
- **Display LAN Info** lets you select how the projector displays network information. You can select an option to display a QR code that lets you quickly connect your iOS or Android devices using the Epson iProjection app.

Note: Use the displayed keyboard to enter the name, passwords, and keyword. Press the arrow buttons on the remote control to highlight characters and press **Enter** (↵) to select them.

7. Select the **Wired LAN** menu and press **Enter** (↵).

8. If necessary, select **IP Settings** and press **Enter** (↵).
9. Select your IP Settings as necessary:
 - If your network assigns addresses automatically, turn on the **DHCP** setting.
 - If you must set addresses manually, turn off **DHCP** and enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address** as needed.

Note: To highlight the numbers you want from the displayed keyboard, press the arrow buttons on the remote control. To select a highlighted number, press **Enter** (↵).

10. To prevent display of the IP address on the standby screen, turn off **IP Address Display**.
11. To connect the projector to the network using IPv6, select **On** as the **IPv6 Settings** option. Then select the **Auto Configuration** and **Use Temporary Address** settings as necessary.
12. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Parent topic: [Wired Network Projection](#)

Wireless Network Projection

You can project over a wireless network. To do this, you must set up your projector and computer for wireless projection.

To connect wirelessly to your projector, configure the connection using the projector's Network menus.

After setting up the projector as described here, install the network software from the included CD or, if you don't have a CD, download the software and manuals as necessary.

Note: Make sure to set the date and time before using the projector's Network menus.

Setting the Date and Time

Selecting Wireless Network Settings Manually

Before you can project from your wireless network, you must select the network settings for the projector using its menu system.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Network** menu and press **Enter** (↵).

4. Select **On** as the **Wireless LAN Power** setting and press **Esc**.
5. Select **Network Configuration** and press **Enter** (↵).

6. Select the **Basic** menu and press **Enter** (↵).

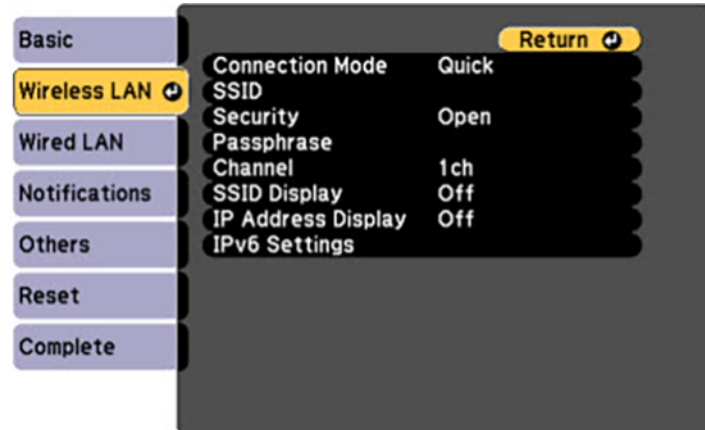

7. Select the following basic options as necessary:
- **Projector Name** lets you enter a name up to 16 alphanumeric characters long to identify the projector over the network.
 - **PLink Password** lets you enter a password up to 32 alphanumeric characters long for using the PLink protocol for projector control.
 - **Web Control Password** lets you enter a password up to 8 alphanumeric characters long for accessing the projector over the web. (Default user name is **EPSONWEB**; default password is **admin**.)
 - **Moderator Password** lets you enter a password up to 4 numbers long for accessing the projector as a moderator with the Epson iProjection (Windows/Mac) software or the Epson iProjection app. (No default password.)
 - **Projector Keyword** lets you turn on a security password to prevent access to the projector by anyone not in the room with it. You must enter a displayed, randomized keyword from a computer using the Epson iProjection (Windows/Mac) software or the Epson iProjection app to access the projector.
 - **Display Keyword** lets you select whether or not to display a projector keyword on the projected image when using the Epson iProjection (Windows/Mac) software to access the projector.

- **Display LAN Info** lets you select how the projector displays network information. You can select an option to display a QR code that lets you quickly connect your iOS or Android devices using the Epson iProjection app.

Note: Use the displayed keyboard to enter the name, passwords, and keyword. Press the arrow buttons on the remote control to highlight characters and press **Enter** (↵) to select them.

8. Select the **Wireless LAN** menu and press **Enter** (↵).

9. Select the settings on the **Wireless LAN** menu as necessary for your network.

Note: Some items may be unavailable if Quick or Advanced connection mode is selected.

10. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

After you complete the wireless settings for your projector, you need to select the wireless network on your computer, or iOS or Android device.

[Wireless LAN Menu Settings](#)

Parent topic: [Wireless Network Projection](#)

Wireless LAN Menu Settings

Setting	Options	Description
Connection Mode	Quick Advanced	Selects the type of wireless connection: Quick: lets you directly connect to multiple devices and computers using the projector's built-in wireless network. Advanced: lets you connect to multiple devices and computers via a wireless network access point
Search Access Point	To Search View	Search for available wireless network access points in Advanced connection mode
SSID	Up 32 alphanumeric characters	Manually set the SSID (network name) of the wireless LAN system the projector is connecting to

Setting	Options	Description
Security	Open WPA2-PSK WPA/WPA2-PSK WPA2-EAP WPA/WPA2-EAP	Selects the type of security used on the wireless network WPA2-PSK: uses WPA2 security with AES for encryption. Use the Passphrase value to establish a connection from a computer WPA/WPA2-PSK: uses WPA personal mode; encryption is dependent on the access point settings; Passphrase must be the same as the access point WPA2-EAP: uses WPA2 security with AES for encryption WPA/WPA2-EAP: uses WPA enterprise mode; encryption is dependent on the access point settings
Passphrase	Various passphrases from 8 to 32 characters (from a web browser, the maximum is 63 characters)	Selects the pre-shared key used on the network; passphrases are case-sensitive. If the network settings are reset after the passphrase has been changed more than once, the first passphrase is restored.
EAP Method	EAP Type User name Password Client Certificate Verify Server Cert. CA Certificate RADIUS Server Name	Sets the EAP settings for WPA2-EAP and WPA/WPA2-EAP security

Setting	Options	Description
Channel	1ch 6ch 11ch	In Quick connection mode, selects the frequency band (channel) used by the wireless LAN
IP Settings	DHCP (On or Off) IP Address Subnet Mask Gateway Address	Selects DHCP if your network assigns IP addresses automatically, or turns off DHCP so you can enter the network's IP address, subnet mask, and gateway address as needed
SSID Display	On Off	Selects whether to display the SSID on the network standby screen and Home screen
IP Address Display	On Off	Selects whether to display the IP address on the network standby screen and Home screen
IPv6 Settings	IPv6 Auto Configuration Use Temporary Address	Selects the IPv6 settings when you connect the projector to the network using IPv6

Selecting Wireless Network Settings in Windows

Before connecting to the projector, select the correct wireless network on your computer.

1. To access your wireless utility software, access the Desktop and double-click the network icon on the Windows taskbar.
2. Do one of the following:
 - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
 - If your projector is configured for Quick mode, select the projector's SSID.
3. Click **Connect**.

Parent topic: [Wireless Network Projection](#)

Selecting Wireless Network Settings on Mac

Before connecting to the projector, select the correct wireless network on your Mac.

1. Click the AirPort icon on the menu bar at the top of the screen.
2. Make sure AirPort is turned on, then do one of the following:
 - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
 - If your projector is configured for Quick mode, select the projector's SSID.

Parent topic: [Wireless Network Projection](#)

Setting Up Wireless Network Security

You can set up security for your projector to use on a wireless network. Set up one of the following security options to match the settings used on your network:

- WPA2-PSK
- WPA2-EAP*
- WPA/WPA2-PSK*
- WPA/WPA2-EAP*

* Available only in **Advanced** connection mode.

Note: If you want to set up WPA2-EAP or WAP/WAP2-EAP security, register your digital certificate file and place it on the SD card you will install in the projector.

1. Press the **Menu** button.

2. Select the **Network** menu and press **Enter** (↵).

3. Select **Network Configuration** and press **Enter** (↵).
4. Select the **Wireless LAN** menu and press **Enter** (↵).
5. Select the **Security** setting and press **Enter** (↵).
6. Select the security settings for your network.
7. When you finished, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Using a QR Code to Connect a Mobile Device

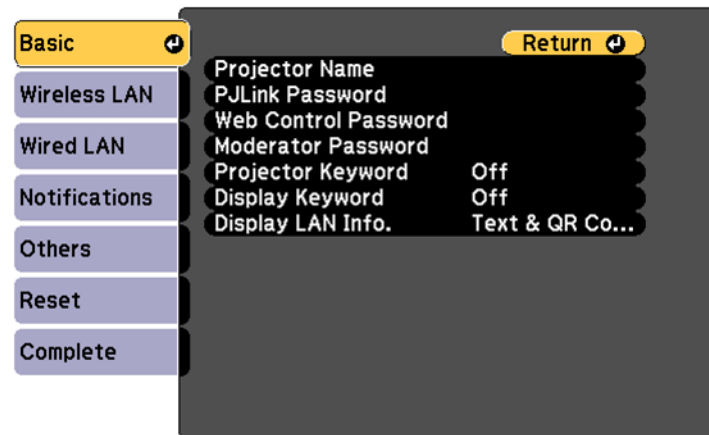

After you select the wireless network settings for your projector, you can display a QR code on the screen and use it to connect a mobile device using the Epson iProjection app.

Note: Make sure you have installed the latest version of Epson iProjection on your device. Visit epson.com/iprojection (U.S.) or epson.ca/iprojection (Canada) for more information.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter** (↵).

3. Select **Network Configuration** and press **Enter** (↵).
4. Select the **Basic** menu and press **Enter** (↵).

5. Set the **Display LAN Info** setting to **Text & QR Code**.
6. Select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

7. Do one of the following:
 - Press the **LAN** button on the remote control.
 - Select **Display the QR Code** in the projector's Network menu.

Your projector displays the QR code on the projection surface.

Note: If you do not see the QR code after pressing the **LAN** button, press **Enter** (↵) to display it.

8. Start Epson iProjection on your mobile device.
9. Use the QR code reader feature to read the QR code and connect your device to the projector. Visit epson.com/iprojection (U.S.) or epson.ca/iprojection (Canada) for instructions.

Parent topic: [Wireless Network Projection](#)

Setting Up Projector Network E-Mail Alerts

You can set up the projector to send you an e-mail alert over the network if there is a problem with the projector.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter** (↵).
3. Select **Network Configuration** and press **Enter** (↵).
4. Select the **Notifications** menu and press **Enter** (↵).

5. Turn on **Mail Notification**.
6. Enter the IP address for the **SMTP Server** setting.

Note: Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255).
7. Select a number for the SMTP server **Port Number** setting, from 1 to 65535 (default is 25).
8. Enter the sender's email address as the **From** setting.
9. Choose an **Address** field, enter the e-mail address, and select the alerts you want to receive there. Repeat for up to three addresses. Your e-mail address can be up to 32 alphanumeric characters long.
10. If you are using the PJLink protocol for projector control, turn on the **PJLink Notification** setting and enter the IP address where you want to receive PJLink notifications as the **Notified IP Address** setting.
11. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Note: If a critical problem causes a projector to shut down, you may not receive an e-mail alert.

[Network Projector E-mail Alert Messages](#)

Parent topic: [Using the Projector on a Network](#)

Network Projector E-mail Alert Messages

When a problem occurs with a networked projector, and you selected to receive e-mail alerts, you receive an e-mail containing the following information:

- The email address entered as the **From** setting
- **Epson Projector** on the subject line
- The name of the projector experiencing a problem
- The IP address of the affected projector
- Detailed information about the problem

Note: If a critical problem causes a projector to shut down, you may not receive an e-mail alert.

Parent topic: [Setting Up Projector Network E-Mail Alerts](#)

Setting Up Monitoring Using SNMP

Network administrators can install SNMP (Simple Network Management Protocol) software on network computers so they can monitor projectors. If your network uses this software, you can set up the projector for SNMP monitoring.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter** (↵).
3. Select **Network Configuration** and press **Enter** (↵).
4. Select the **Notifications** menu and press **Enter** (↵).

5. Turn on the **SNMP** setting.
6. Enter up to two IP addresses to receive SNMP notifications as the **Trap IP Address** setting, using 0 to 255 for each address field.

Note: Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255).

7. Select the **Others** menu and press **Enter** (↵).

8. If you want to use the Secure HTTP protocol to encrypt communication when using Web Control, turn on the **Secure HTTP** setting and import the web server certificate using the **Web Server Cert.** setting.
9. If available, select the **Priority Gateway** setting for your network.
10. If your network environment uses a Crestron Connected controller, turn on the **Crestron Connected** setting to allow the projector to be detected.
11. If your network environment uses an Art-Net communication protocol, turn on the **Art-Net** setting.
12. If you want this projector to receive broadcast messages over the network, turn on the **Message Broadcasting** setting. Administrators can broadcast messages over the network using the Epson Projector Management software.
13. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Parent topic: [Using the Projector on a Network](#)

Controlling a Networked Projector Using a Web Browser

Once you have connected your projector to your network, you can select projector settings and control projection using a compatible web browser. This lets you access the projector remotely.

Note: The web setup and control features support Microsoft Internet Explorer 11.0 or later, Microsoft Edge, Google Chrome, and Safari on networks that do not use a proxy server for connection. You cannot select all of the projector menu settings or control all projector functions using a web browser.

Note: If you set Standby Mode to **Communication On** in the Extended menu, you can use a web browser to select settings and control projection even if the projector is in standby mode.

1. Make sure the projector is turned on.
2. Start your web browser on a computer or device connected to the network.
3. Type the projector's IP address into the browser's address box and press the computer's **Enter** key.

Note: If you attempt to connect to the Epson Web Control screen via a proxy server, the screen will not be displayed. Make a direct connection to the Epson Web Control screen.

You see the Epson Web Control screen:

4. To control projection remotely, select the **Remote** option from the Epson Web Control screen.

Note: If you see a log in window, enter your user name and password. (The default user name is **EPSONWEB** and the default password is **admin**.)

You see a screen like this:

- 1 Power button control
- 2 Selects the image source or turns on Spotlight mode
- 3 **AV Mute** button control
- 4 **Volume** button controls
- 5 Adds overlay effect to image
- 6 Selects a saved playlist

5. Select the icon corresponding to the projector function you want to control.
6. To select projector menu settings, select **Advanced** on the Epson Web Control screen.

Note: If you see a log in window, enter your user name and password. (The default user name is **EPSONWEB** and the default password is **admin**.)

7. Select the name of the menu and follow the on-screen instructions.

Setting Up Crestron Connected

To set up your projector for monitoring and control using a Crestron Connected system, make sure your computer and projector are connected to the network.

Note: If you want to use the Crestron Connected system when the projector is turned off, you need to adjust the **Standby Mode** settings in the Extended menu.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter** (↵).
3. Select **Network Configuration** and press **Enter** (↵).

4. Select the **Others** menu and press **Enter** (↵).

5. Set the **Crestron Connected** setting to **On** to allow the projector to be detected.

Note: Enabling Crestron Connected disables the Epson Message Broadcasting feature in the Epson Projector Management software.

6. Turn off the projector, then turn it on again to enable the setting.

[Projector Setup Settings - Extended Menu](#)

Controlling a Networked Projector Using Crestron Connected

Once you have set up your projector to use Crestron Connected, you can control and monitor projection using a compatible web browser.

1. Start your web browser on a computer connected to the network.
2. Type the projector's IP address into the browser's address box and press the computer's **Enter** key.

You see the Epson Web Control screen:

3. Select **Crestron Connected**.

You see this screen:

4. Select the input source that you want to control in the Sources List box. You can scroll through available sources using the up and down arrows in the box.
5. To control projection remotely, click the on-screen buttons that correspond to the projector's remote control buttons. You can scroll through button options at the bottom of the screen.

Note: These on-screen buttons do not directly correspond to the projector's remote control buttons:

- **OK** acts as the  button
- **Menu** displays the projector's menu

6. To view information about the projector, click the **Info** tab.
7. To change projector, Crestron, and password settings, click the **Tools** tab, select settings on the displayed screen, and click **Send**.
8. When you finish selecting settings, click **Exit** to exit the program.

Art-Net Channel Definitions

Art-Net is an Ethernet communication protocol based on the TCP/IP protocol. You can control the projector by using a DMX controller or an application system.

The following table lists the channel definitions used to control the projector in Art-Net.

Channel/Function	Operation	Parameters	Description
1 Adjusting light (dimming)	0% to 100%	0 to 255 (default is 0)	Adjusts the image brightness
2 Shutter control	Shutter open Non-operational Shutter closed	0 to 63 (default is 128) 64 to 191 192 to 255	Enables/disables A/V Mute

Channel/Function	Operation	Parameters	Description
3 Switch source	Non-operational HDMI LAN SD Player Spotlight Non-operational	0 to 7 (default is 0) 8 to 15 16 to 23 24 to 31 32 to 39 40 to 255	Switches to the specified source
7 Zoom	(+) lens adjustment (large) (+) lens adjustment (medium) (+) lens adjustment (small) Non-operational (-) lens adjustment (small) (-) lens adjustment (medium) (-) lens adjustment (large)	0 to 31 (default is 128) 32 to 63 64 to 95 96 to 159 160 to 191 192 to 223 224 to 255	Zooms using the specified amount of movement
8 Electronic focus	(+) lens adjustment (large) (+) lens adjustment (medium) (+) lens adjustment (small) Non-operational (-) lens adjustment (small) (-) lens adjustment (medium) (-) lens adjustment (large)	0 to 31 (default is 128) 32 to 63 64 to 95 96 to 159 160 to 191 192 to 223 224 to 255	Performs electronic focus using the specified amount of movement

Channel/Function	Operation	Parameters	Description
10 Content playback	Non-operational	0 to 3 (default is 0)	Plays the specified playlist
	Playlist 1	4 to 7	
	Playlist 2	8 to 11	
	Playlist 3	12 to 15	
	Playlist 4	16 to 19	
	Playlist 5	20 to 23	
	Playlist 6	24 to 27	
	Playlist 7	28 to 31	
	Playlist 8	32 to 35	
	Playlist 9	36 to 39	
	Playlist 10	40 to 43	
	Playlist 11	44 to 47	
	Playlist 12	48 to 51	
	Playlist 13	52 to 55	
	Playlist 14	56 to 59	
	Playlist 15	60 to 63	

Channel/Function	Operation	Parameters	Description
10 Content playback	Playlist 16	64 to 67	
	Playlist 17	68 to 71	
	Playlist 18	72 to 75	
	Playlist 19	76 to 79	
	Playlist 20	80 to 83	
	Playlist 21	84 to 87	
	Playlist 22	88 to 91	
	Playlist 23	92 to 95	
	Playlist 24	96 to 99	
	Playlist 25	100 to 103	
	Playlist 26	104 to 107	
	Playlist 27	108 to 111	
	Playlist 28	112 to 115	
	Playlist 29	116 to 119	
	Playlist 30	120 to 123	
	Playlist 31	124 to 127	
	Playlist 32	128 to 131	
	Playlist 33	132 to 135	
	Playlist 34	136 to 139	
	Playlist 35	140 to 143	
Playlist 36	144 to 147		
Playlist 37	148 to 151		
Playlist 38	152 to 155		
Playlist 39	156 to 159		
Playlist 40	160 to 163		

Channel/Function	Operation	Parameters	Description
10 Content playback	Playlist 41	164 to 167	
	Playlist 42	168 to 171	
	Playlist 43	172 to 175	
	Playlist 44	176 to 179	
	Playlist 45	180 to 183	
	Playlist 46	184 to 187	
	Playlist 47	188 to 191	
	Playlist 48	192 to 195	
	Playlist 49	196 to 199	
	Playlist 50	200 to 203	
	Non-operational	204 to 255	
11 Power control	Power off	0 to 63 (default is 128)	Turns the projector power on or off
	Non-operational	64 to 191	
	Power on	192 to 255	
13 Lock	Cannot control	0 to 127 (default is 0)	Enables/disables Art-Net operations
	Can control	128 to 255	

Note: If you are controlling the projector using Art-Net and operating it from the remote control, settings made by the DMX controller or application software may differ from the projector's actual status. If you want to apply all the channel controls to the projector, set Channel 13 to **Cannot control**, then set it back to **Can control**.

Parent topic: [Using the Projector on a Network](#)

Setting Up Web API

You can setup Web API from a Web browser and operate the projector using Web API.

1. Open the Epson Web Control from your Web browser.
2. Select **Developer's Menu**.
3. Set the **Enable API** setting to **On**.

4. Enter one of the following Web APIs to operate the projector:

URL	Supported methods	Description
http://<ip>/api/v01/contentmgr/remote/power/on	GET/POST/PUT	Turns the projector on (WebAPI may not respond immediately)
http://<ip>/api/v01/contentmgr/remote/power/off		0 to 63 (default is 128)
http://<ip>/api/v01/contentmgr/playlist/play/:id		0 to 7 (default is 0)
http://<ip>/api/v01/contentmgr/playlist/stop		0 to 31 (default is 128)

Note: In the above URLs, enter the IP address for the projector in the <ip> field. For example, a URL instructing a projector with the IP address 192.168.0.2 to playback playlist ID 3 would look like this:
<http://192.168.0.2/api/v01/contentmgr/playlist/play/3>

If secure HTTP is enabled, change the http in the URL to https.

[Digital Certificate Types](#)

Parent topic: [Using the Projector on a Network](#)

Importing a Web Server Certificate Using the Projector Menus

You can create your web server certificate and import it using the projector menus and an SD card.

Note: You can also register digital certificates from your web browser. Make sure to only register once, or the certificate may not install correctly.

1. Insert an SD card into the projector's SD card slot, if necessary. (Make sure your digital certificate file is compatible with projector registration and saved in the root directory of the SD card.)
2. Press the **Menu** button.
3. Select the **Network** menu and press **Enter** (↵).

4. Select the **Network Configuration** setting and press **Enter** (↵).

5. Select the **Others** menu and press **Enter** (↵).

6. Select **On** as the **Secure HTTP** setting.
7. Select the **Web Server Cert.** setting and press **Enter** (↵).
8. Select **Register** and press **Enter** (↵).
9. Press **Enter** (↵) to display the certificate list.
10. Select the certificate you want to import from the displayed list.

A message is displayed prompting you to enter the password for the certificate.

11. Enter the password and press **Enter** (↵).

The certificate is imported and a completion message appears.

Parent topic: [Registering a Digital Certificate on the Projector](#)

Registering Digital Certificates from a Web Browser

You can register the digital certificates on the projector for wireless LAN authentication.

1. Make sure your digital certificate file is compatible with projector registration.
2. Make sure the projector is turned on.
3. Start your web browser on a computer or mobile device connected to the network.
4. Type the projector's IP address into the browser's address box and press the computer's **Enter** key.

You see the Web Control screen and a prompt to enter a user ID and password.

5. Enter the following information in uppercase or lowercase letters, exactly as shown:
 - For the user ID, enter **EPSONWEB**. (You cannot change the user ID.)
 - For the password, enter the default password **admin**. (You can change the Web Control password using the projector's Network menu.)
6. Select **Advanced**.
7. Under **Network**, select **Certificate**.

You see a screen like this:

The screenshot shows the 'Network' configuration page with a left-hand navigation menu. The 'Certificate' option is selected, and the 'Client Certificate' section is expanded. The 'Web Server Certificate' section is also visible. The 'File' field for the Client Certificate has a 'Browse...' button. The 'Password' field is empty. The 'Issued to' and 'Issued by' fields are empty. The 'Expiration Date' field is empty. The 'CA certificate' section has a 'File' field with a 'Browse...' button. The 'Issued to' and 'Issued by' fields are empty. The 'Expiration Date' field is empty. The 'Web Server Certificate' section has a 'File' field with a 'Browse...' button. The 'Password' field is empty. The 'Issued to' and 'Issued by' fields are both set to 'EBECFCFF'. The 'Expiration Date' field is set to '2100-01-01 00:00:00'. At the bottom, there is a message: 'Select the Apply button after selecting settings.' and an 'Apply' button. There is also an 'Others' dropdown menu at the bottom.

Turning On the Projector

Turn on the computer or video equipment you want to use before you turn on the projector so it can display the image source.

1. Connect the power cord to the projector's power inlet.

2. Plug the power cord into an electrical outlet.

The projector's On/Standby light turns blue. This indicates that the projector is receiving power.

Note: With **Direct Power On** turned on, the projector turns on as soon as you plug it in.

Note: If the projector is installed in a lighting track (using the optional lighting track mount), the projector enters standby mode as soon as you turn on the lighting track.

3. Press the power button on the projector or remote control to turn on the projector.

The Status light flashes blue as the projector warms up. After about 30 seconds, the Status light stops flashing and turns blue.

Warning: Never look into the projector lens when the laser is on. This can damage your eyes and is especially dangerous for children and pets.

Caution: Make sure no objects are blocking the light from the projector lens. Objects blocking the lens for an extended time can melt and light that is reflected back into the lens can cause the projector to malfunction.

If you do not see a projected image right away, try the following:

- Turn on the connected computer or video device.
- Insert a DVD or other video media and press the play button, if necessary.
- Press one of the source buttons (**Spotlight**, **HDMI**, **LAN**, or **SD**) on the remote control to switch to the correct image source.

Note: If the **Auto Power On** setting in the Extended menu is set to **HDMI**, the projector automatically turns on when an HDMI signal is detected.

- Change the screen output from the computer when using a laptop.

Turning Off the Projector

Before turning off the projector, shut down any computer connected to it so you can see the computer display during shutdown.

Note: Turn off this product when not in use to prolong the life of the projector. Laser life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

Note: When using the A/V Mute feature, the laser is still on. To turn off the laser, turn off the projector.

1. Press the power button on the projector or remote control.
The projector displays a shutdown confirmation screen.

2. Press the power button again. (To leave it on, press any other button.)
The laser turns off and the Status light turns off.

Note: With Epson's Instant Off technology, there is no cool-down period so you can pack up the projector for transport right away (if necessary).

Caution: Do not turn the projector on immediately after turning it off. Turning the projector on and off frequently may shorten the life of the laser.

Note: If the projector is installed in a lighting track (using the optional lighting track mount), also turn off the power to the lighting track.

3. To transport or store the projector, make sure the Status light is off, then unplug the power cord.

Selecting the Language for the Projector Menus

If you want to view the projector's menus and messages in another language, you can change the Language setting.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Extended** menu and press **Enter** (↵).

4. Select the **Language** setting and press **Enter** (↵).
5. Select the language you want to use and press **Enter** (↵).
6. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Setting the Date and Time

You can set the date and time for the projector.

Note: If the **Schedule Protection** setting in the Password Protection screen is enabled, you cannot change the date and time settings.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter** (↵).
3. Select the **Operation** setting and press **Enter** (↵).
4. Select the **Date & Time** setting and press **Enter** (↵).

You see a screen like this:

5. Select the **Date & Time** setting and press **Enter** (↵).
6. Select your date and time settings. Then select **Set** to confirm your changes.
7. When you are finished, press the **Menu** button to exit.

Parent topic: [Using Basic Projector Features](#)

Image Shape

You can project an evenly rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilted up or down, or off to the side, you may need to correct the image shape for the best display quality.

[Correcting Image Shape with H/V Keystone](#)

[Correcting Image Shape with Quick Corner](#)

Parent topic: [Using Basic Projector Features](#)

Correcting Image Shape with H/V Keystone

You can use the projector's **Keystone** setting to correct the shape of an image that is unevenly rectangular on the sides.

Note: You cannot combine **Keystone** correction with other image shape correction methods.

1. Turn on the projector and display an image.

Note: You can display a pattern to aid in adjusting the projected image using the Settings menu.

Note: You can also display the pattern by pressing the **Pattern** button on the remote control.

2. Press the **Menu** button.

3. Select the **Settings** menu and press **Enter** (↵).

Note: You can also press the **Keystone** button on the remote control to display the Keystone adjustment screen.

4. Select the **Keystone** setting and press **Enter** (↵).
5. Select **H/V Keystone** and press **Enter** (↵). Then press **Enter** (↵) again.
6. Use the arrow buttons on the remote control to select between vertical and horizontal keystone correction, and to adjust the image shape as necessary.

V-Keystone

H-Keystone

7. When you are finished, press **Esc**.
After correction, your image is slightly smaller.

Parent topic: [Image Shape](#)

[Projector Feature Settings - Settings Menu](#)

Correcting Image Shape with Quick Corner

You can use the projector's Quick Corner setting to correct the shape and size of an image that is unevenly rectangular on all sides.

Note: To provide the best possible image quality, adjust the projector's position to correct the image shape. If this isn't possible, use the Quick Corner setting to correct the image shape.

Note: You cannot combine Quick Corner correction with other image shape correction methods.

1. Turn on the projector and display an image.

Note: You can display a pattern to aid in adjusting the projected image using the Settings menu.

Note: You can also display the pattern by pressing the **Pattern** button on the remote control.

2. Press the **Menu** button.
3. Select the **Settings** menu and press **Enter**.

Note: You can also press the **Keystone** button on the remote control to display the Keystone adjustment screen.

4. Select the **Keystone** setting and press **Enter**.
5. Select the **Quick Corner** setting and press **Enter** (↵). Then press **Enter** (↵) again.

You see the Quick Corner adjustment screen:

Note: To reset your adjustments, press and hold the **Esc** button for at least 2 seconds to display a reset screen. Then select **Yes**.

6. Use the arrow buttons on the remote control to select the corner of the image you want to adjust. Then press **Enter** (↵).
7. Press the arrow buttons to adjust the image shape as necessary. Press **Enter** (↵) to return to the area selection screen.
8. When you are finished, press **Esc**.

Focusing the Image Using the Focus Buttons

You can adjust the sharpness of the projected image using the focus buttons on the remote control.

1. Turn on the projector and display an image.

2. Press the **Focus** arrow buttons on the projector's remote control to adjust the focus.

3. Press the **Esc** button when finished.

Parent topic: [Using Basic Projector Features](#)

Zooming Into and Out of Images

You can draw attention to parts of an image by zooming into a portion of the image and enlarging it on the screen.

1. Press the **Zoom +** button on the remote control.

You see a crosshair on the screen indicating the center of the zoom area.

2. Use the following buttons on the remote control to adjust the zoomed image:
 - Use the arrow buttons to position the crosshair in the image area you want to zoom into.
 - Press the **Zoom +** button repeatedly to zoom into the image area, enlarging it as necessary.
 - To pan around the zoomed image area, use the arrow buttons.
 - To zoom out of the image, press the **Zoom –** button as necessary.
 - To return to the original image size, press **Esc**.

Parent topic: [Using Basic Projector Features](#)

Shutting Off the Picture and Sound Temporarily

You can temporarily turn off the projected picture and sound if you want to redirect your audience's attention during a presentation. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.

If you want to display an image such as a company logo or picture when the presentation is stopped, you can set up this feature using the projector's menus.

1. Press the **A/V Mute** button on the remote control to temporarily stop projection and mute any sound.

2. To turn the picture and sound back on, press **A/V Mute** again.

Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room, up to 23 feet (7 m) away. You can point it at the front or back of the projector.

Make sure that you aim the remote control at the projector's receiver within the angles listed here.

- 1 $\pm 60^\circ$
- 2 $\pm 15^\circ$
- 3 23 feet (7 m)

Note: Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.

Parent topic: [Using Basic Projector Features](#)

Selecting an Image Source

If you connected multiple image sources to the projector, such as a computer and SD card, you may want to switch from one image source to the other.

1. Make sure the connected image source you want to use is turned on.
2. For video image sources, insert a DVD or other video media and press its play button, if necessary.

3. Press the button for the source you want on the remote control.

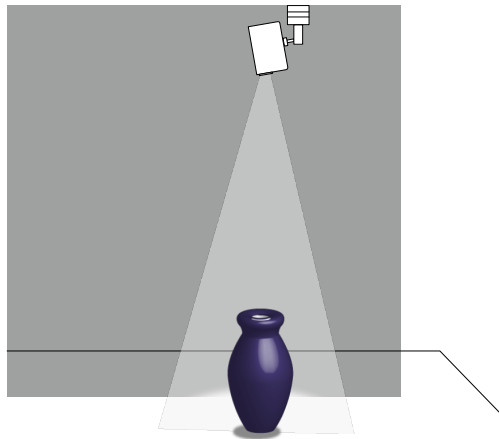

- 1 HDMI source (switches to images from a connected computer or other HDMI video source)
- 2 Network source (switches to images from a computer or mobile device connected over a network)
- 3 SD card source (switches to images on an inserted SD card)
- 4 Spotlight (switches to spotlight mode)

Parent topic: [Using Basic Projector Features](#)

Using Spotlight Mode

You can use spotlight mode to project a virtual spotlight and customize the position, size, shape and width of the light.

1. Press the **Spotlight** button on the remote control.

The projection image becomes a spotlight.

2. Press the **Effect** button on the remote control to change the overlay effect and shape filter for the spotlight.

Parent topic: [Using Basic Projector Features](#)

[Overlay Effects and Shape Filters](#)

Selecting a Playlist on an SD Card

You can create playlists combining images and movies and save them to an SD card. You can then insert the SD card into the projector and select the playlist you want to project.

Note: See the *Epson Projector Content Manager Operation Guide* for information about creating playlists and exporting them to an SD card.

1. Insert an SD card containing content playlists into the projector's **SD** card slot.

2. To select a playlist, do one of the following:

- Press the **SD** button on the projector's remote control to project the playlist on the SD card that was played last. If there is a timetable assigned, the playlist will play back according to the schedule in the timetable.

- Press the **SD Viewer** button on the projector's remote control and use the arrow buttons to select a playlist from the displayed list.

- Start a specific playlist assigned to a favorite playlist's button by pressing the corresponding number button on the projector's remote control.

Note: You can assign playlists to each of the number buttons (1 to 9) on the projector's remote control using the Epson Projector Content Manager software. See the *Epson Projector Content Manager Operation Guide* for details.

Overlay Effects and Shape Filters

You can select Color Filter, Lightness, and Shape Filter settings to create an overlay effect. You can then assign a separate Overlay Effect to each input source. You can also assign Overlay Effect and size and position settings for the standard shape effect filters in your projector's menu.

Note: You can apply filters and effects to an entire playlist on an SD card, but not to each video or image file in the playlist. For more information on effects, see the *Epson Projector Content Manager Operation Guide* for details.

Caution: Do not remove the SD card or unplug the projector while using Overlay Effect. Otherwise, you may damage data saved on the SD card.

[Selecting a Shape Effect](#)

[Adjusting the Color of the Effect](#)

[Adjusting the Brightness of the Effect](#)

Parent topic: [Using Basic Projector Features](#)

Selecting a Shape Effect

You can select a standard or customized shape effect filter and apply it to the spotlight or playlist.

1. Press the **Effect** button on the projector's remote control.

You see this screen:

2. Set the **Overlay Effect** setting to **On**.
3. Select **Shape Filter** and press **Enter** (↵).

You see this screen:

- To change the shape of the effect, select **Shape**, press **Enter** (↵), select a shape option, and press **Menu** to exit.

Note: The standard shape effect filters are **Circle 1** to **Circle 3** and **Rectangle 1** to **Rectangle 3**. You can also create custom shapes using the Epson Projector Content Manager software.

- To apply a filter to the effect, select **Filter Effect**, press **Enter** (↵), select a filter effect option, and press **Menu** to exit.
- To change the size of the effect, select **Size**, press **Enter** (↵), and use the left and right arrow buttons to adjust the height and width. Press **Menu** to exit.
- To change the position of the effect, select **Position**, press **Enter** (↵), and use the arrow buttons to adjust the position of the shape. Press **Menu** to exit.

Parent topic: [Overlay Effects and Shape Filters](#)

Adjusting the Color of the Effect

You can add a color to the overlay effect from the list of available effects. You can then apply the overlay effect to the spotlight or a playlist.

- Press the **Effect** button on the projector's remote control.

You see this screen:

2. Set the **Overlay Effect** setting to **On**.
3. Select **Color Filter** and press **Enter** (↵).

You see this screen:

4. Select **Color Filter**, press **Enter** (↵), and use the left and right arrow buttons to select a color for the overlay effect. Press **Menu** to exit.
5. To assign a color that is not available in the Color Filter list, select **Custom**, press **Enter** (↵), and use the arrow buttons to adjust the color. Press **Menu** to exit.

Parent topic: [Overlay Effects and Shape Filters](#)

Adjusting the Brightness of the Effect

You can lighten or darken the overlay effect and apply it to the spotlight or playlist.

1. Press the **Effect** button on the projector's remote control.

You see this screen:

2. Set the **Overlay Effect** setting to **On**.
3. Select **Lightness** and press **Enter** (↵).
4. Use the left and right arrow buttons to lighten or darken the effect.
5. Press **Menu** to exit.

Parent topic: [Overlay Effects and Shape Filters](#)

Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** (default setting) lets you project from a table in front of the screen.
- **Front/Ceiling** flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.
- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Ceiling** flips the image over top-to-bottom and horizontally to project from the ceiling and behind a translucent screen.

Setting the Remote Control ID

The remote control's ID is set to zero by default so it can operate any compatible projector. If you want to set the remote control to operate only a particular projector, you need to set the remote control's ID to match the projector's ID.

Note: You must set the remote control ID to match the projector ID each time you turn on the projector you have set it to control.

1. Turn on the projector you want the remote control to operate with exclusively.
2. Aim the remote control at that projector.
3. Hold down the **ID** button on the remote control while you press the numeric button that matches the projector's ID. Then release the buttons.

4. Press the **ID** button on the remote control to check if the ID-setting process worked.
You see a message displayed by the projector.
 - If the remote control is listed as **On**, the remote control ID is set to operate only the listed projector.
 - If the remote control is listed as **Off**, the remote control ID is not set properly. Repeat the steps above to set the ID to match the projector you want to control.

Adjusting the Projector's Brightness Level

When projecting with multiple projectors, you must adjust the brightness setting so that all projectors are equally bright. (Even after adjusting the brightness levels, the brightness of each projector may not match exactly.)

Note: Make sure the Multi-Projection setting is on (**Menu > Extended > Multi-Projection > On**) before you adjust the projector's brightness level.

1. Turn on all the projectors and display the same image.
2. Press the **Menu** button.
3. Select the **Settings** menu and press **Enter** (↵).

4. Select **Brightness Settings** and press **Enter** (↵).
5. Select the **Light Source Mode** setting and choose one of the following:
 - **Normal:** Sets the brightness to the maximum level (estimated life span of the light source is approximately 20,000 hours)
 - **Quiet:** Sets the brightness to 50% and reduces fan noise (estimated life span of the light source is approximately 20,000 hours)
 - **Extended:** Sets the brightness to 50% and extends the life expectancy of the light source (estimated life span of the light source is approximately 30,000 hours)
 - **Custom:** Select a custom brightness level between 50% and 100%
6. If you select **Custom**, select the **Brightness Level** setting from the Brightness Settings screen and use the left and right arrow buttons on the remote control to adjust the brightness level.
7. Press **Esc** to return to the previous screen.

Parent topic: [Using Multiple Projectors](#)

[Projector Setup Settings - Extended Menu](#)

Scaling an Image

You can project the same image from multiple projectors and use the Scale feature to crop and combine them into one large image.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter** (↵).
3. Select the **Multi-Projection** setting and press **Enter** (↵).
4. Select the **Scale** setting and press **Enter** (↵).

You see this screen:

5. Set the **Scale** setting to **On**.
6. Select the **Scale Mode** setting and select one of these options:
 - **Zoom Display** to maintain the image aspect ratio as you scale the image

- **Full Display** to adjust the image to the projector's screen size as you scale the image

7. Use the arrow buttons to adjust each of the following scale options as necessary:
 - **-** or **+** to scale the image horizontally and vertically at the same time
 - **Scale Vertically** to scale the image vertically only
 - **Scale Horizontally** to scale the image horizontally only
8. Select the **Clip Adjustment** setting and use the arrow buttons to adjust the coordinates and size of each image as you view the screen.

9. When you are finished, press the **Menu** button.

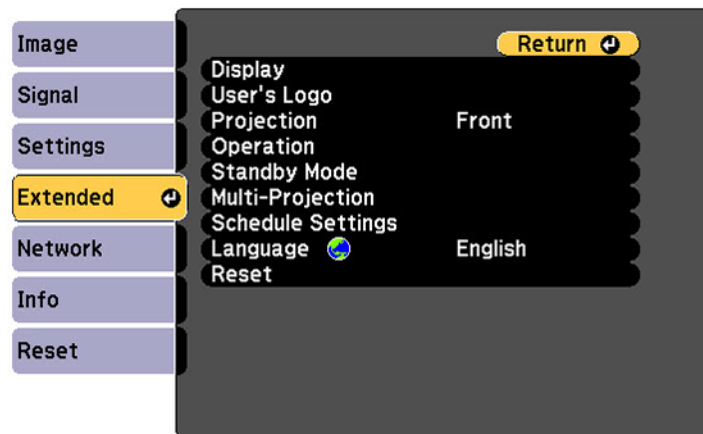

Parent topic: [Using Multiple Projectors](#)

Adjusting Color Uniformity

If the color tone is uneven on each screen, adjust the color tone balance in the Extended menu of each projector. (The color tone may not be uniform even after performing color uniformity.)

Note: If you cannot adjust color uniformity, make sure the **Color Mode** setting is not set to **Dynamic**.

1. Press the **Menu** button on the remote or control panel, select the **Extended** menu, and press **Enter** (↵).

2. Select the **Multi-Projection** setting and press **Enter** (↵).
3. Select the **Color Uniformity** setting and press **Enter** (↵).

4. Select **On** as the **Color Uniformity** setting and press **Enter** (↵), then press **Esc**.
5. Select **Adjustment Level** and press **Enter** (↵).
6. Select an adjustment level and press **Esc**.
7. Select **Start Adjustments** and press **Enter** (↵).
8. Select the area you want to adjust and press **Enter** (↵).

9. Select **Red**, **Green**, or **Blue** and press the left arrow button to weaken the color tone or the right arrow button to strengthen the color tone.

Note: The adjustment screen changes each time you press **Enter** (↵).

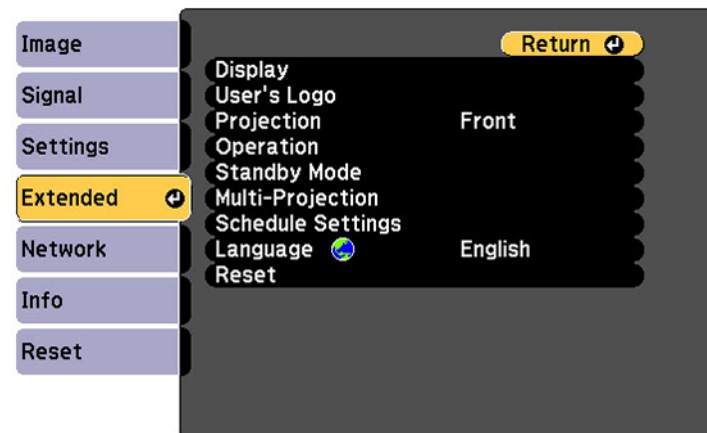

10. Press **Esc** to return to the area selection screen.
11. Repeat steps 8 through 10 for each area, then select **All** to adjust the entire screen.
12. Press **Esc** to exit the menus.

Parent topic: [Using Multiple Projectors](#)

Matching the Image Colors

You can match the display color of multiple projectors that will project next to one another.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter** (↵).

3. Select the **Multi-Projection** setting and press **Enter** (↵).
4. Select the **Color Matching** setting and press **Enter** (↵).

You see this screen:

5. Press the left or right arrow buttons to select a value for the **Adjustment Level** setting.

Note: There are several adjustment levels and you can adjust each level individually.

6. Press the left or right arrow buttons to adjust the color tone for the **Red**, **Green**, and **Blue** settings.
7. Press the left or right arrow buttons to adjust the **Brightness** setting.
8. Repeat the previous three steps as necessary to adjust each adjustment level.

Parent topic: [Using Multiple Projectors](#)

Projecting One Image Simultaneously (Synchronized Playback)

You can set up a timetable to simultaneously project a synchronized playlist across multiple (up to 16) projectors.

Note: You can create playlists and set timetables for them using the Epson Projector Content Manager software. See the *Epson Projector Content Manager Operation Guide* for details.

Make sure the name, date, and time settings are correct for all projectors that will be involved in synchronized playback.

1. Insert an SD card containing playlists into each projector's SD card slot.

2. Press the **SD** button on the remote control for each projector.
Synchronized playback starts at the time specified in the playlist timetables.

[Editing a Scheduled Event](#)

Parent topic: [Adjusting Projector Features](#)

Saving a Scheduled Event

You can select projector commands you want to perform and schedule them as an event.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter** (↵).
3. Select the **Schedule Settings** setting and press **Enter** (↵).
4. Select the **Schedule** menu and press **Enter** (↵).
5. Select **Add New** and press **Enter** (↵).
6. In the Event Settings section, select the events you want to have occur. (Select **No Change** for events that you do not want to occur.)
7. In the Date/Time Settings section, set the date and time for the scheduled events to occur.
8. When you are finished, select **Save** and press **Enter** (↵).
9. To schedule more events, repeat the previous steps as necessary.
10. Select **Setup complete** and select **Yes** to save your changes.

Parent topic: [Scheduling Projector Events](#)

Viewing Scheduled Events

You can view your scheduled events on the calendar displayed on the Schedule Settings screen.

1. Press the **Menu** button on the remote control or control panel.
2. Select the **Extended** menu and press **Enter** (↵).
3. Select **Schedule Settings** and press **Enter** (↵).
4. Select **Schedule** and press **Enter** (↵).

You see a screen like this:

Colored boxes on the calendar indicate the following:

-  One-time event
-  Repeating event
-  Communication is on or off
-  Event is invalid

5. To view an event, press the left and right arrow buttons on the remote to select a day.
The screen displays the details of the events scheduled for that day. A blue icon indicates an enabled event, a gray icon indicates a disabled event, and the  icon indicates a repeating event.

Parent topic: [Scheduling Projector Events](#)

Editing a Scheduled Event

You can edit any currently scheduled event.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter** (.
3. Select the **Schedule Settings** setting and press **Enter** (.

You see a screen like this:

4. Press the left or right arrow buttons to highlight the date on the calendar containing the scheduled event you want to edit.
5. Press the up or down arrow buttons to highlight the event you want to edit, and press **Esc**.
6. Select one of the following:
 - **On/Off** to enable or disable the selected event.
 - **Edit** to edit the settings for the selected event.
 - **Clear** to delete the selected event.
 - **Add New** to add a new scheduled event.
7. When you are finished, select **Return** and press **Enter** (↵).
8. Select **Setup complete** and select **Yes** to save your changes.

Note: To delete all scheduled events, select **Schedule Reset** and select **Yes**.

Projector Security

You can secure your projector to deter theft or prevent unintended use. You can set up passwords to prevent the projector from being turned on, and prevent changes to the startup screen and other settings.

[Password Security Types](#)

Parent topic: [Adjusting Projector Features](#)

Password Security Types

You can set up these types of password security using one shared password:

- **Power On Protection** password prevents anyone from using the projector without first entering a password.
- **User's Logo Protection** password prevents anyone from changing the custom screen the projector can display when it turns on or when you use the A/V Mute feature. The presence of the custom screen discourages theft by identifying the projector's owner.
- **Network Protection** password prevents anyone from changing the network settings in the projector menus.
- **Schedule Protection** password prevents anyone from changing the projector's time or schedule settings.

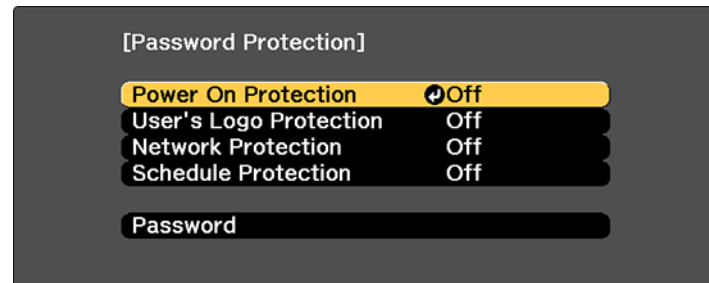

Parent topic: [Projector Security](#)

Setting a Password

To use password security, you must set a password.

Note: The default password is set to **0000**.

1. Hold down the **Effect** button on the remote control for about five seconds or until you see this menu.

2. Press the down arrow to select **Password** and press **Enter** (↵).
You see the prompt "Change the password?".
3. Select **Yes** and press **Enter** (↵).

4. Press the number buttons to set a four-digit password.

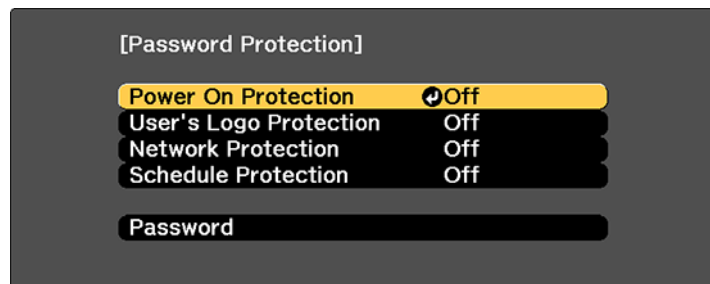

The password displays as **** as you enter it. Then you see the confirmation prompt.

5. Enter the password again.
You see the message "Password accepted."
6. Press **Esc** to return to the menu.
7. Make a note of the password and keep it in a safe place in case you forget it.

Parent topic: [Adjusting Projector Features](#)

Selecting Password Security Types

After setting a password, you see this menu, allowing you to select the password security types you want to use.

If you do not see this menu, hold down the **Effect** button on the remote control for about five seconds or until the menu appears.

- To prevent unauthorized use of the projector, select **Power On Protection**, press **Enter** (↵), select **On**, press **Enter** (↵) again, and press **Esc**.

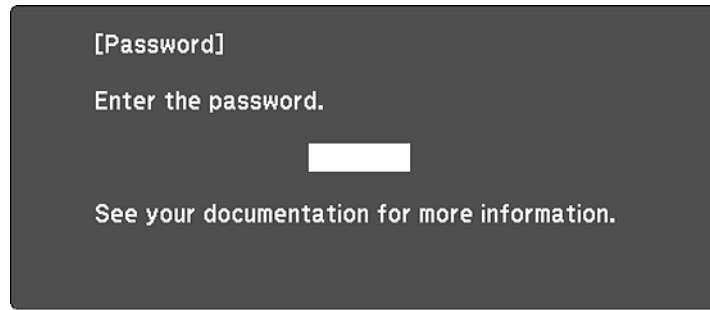

- To prevent changes to the User's Logo screen or related display settings, select **User's Logo Protection**, press **Enter** (↵), select **On**, press **Enter** (↵) again, and press **Esc**.
- To prevent changes to network settings, select **Network Protection**, press **Enter** (↵), select **On**, press **Enter** (↵) again, and press **Esc**.
- To prevent changes to the projector's time or schedule settings, select **Schedule Protection**, press **Enter** (↵), select **On**, press **Enter** (↵) again, and press **Esc**.

Note: Be sure to keep the remote control in a safe place; if you lose it, you will not be able to enter the password required to use the projector.

Parent topic: [Adjusting Projector Features](#)

Entering a Password to Use the Projector

If a password is set up and a **Power On Protection** password is enabled, you see a prompt to enter a password whenever you turn on the projector.

[0-9] :Enter

You must enter the correct password to use the projector.

1. Use the number buttons on the remote control to enter the password.

Note: The default password is **0000**.

The password screen closes.

2. If the password is incorrect, the following may happen:
 - You see a "wrong password" message and a prompt to try again. Enter the correct password to proceed.
 - If you have forgotten the password, make note of the **Request Code: xxxxx** number that appears on the screen and contact Epson Support.
 - If you enter an incorrect password three times in succession, you see a message telling you that the projector is locked. After the message is displayed for 5 minutes, the projector enters standby mode. Unplug the projector, plug in the power cord, and turn on the projector. You see a prompt to enter the password.
 - If you continue to enter an incorrect password 30 times in succession, the projector displays a request code and a message to contact Epson Support. Do not attempt to enter the password again. When you contact Epson Support, provide the displayed request code and proof of ownership for assistance in unlocking the projector.

[Where to Get Help](#)

Saving a User's Logo Image to Display

You can transfer an image to the projector and then display it whenever the projector turns on. You can also display the image when the projector is not receiving an input signal or when you temporarily stop projection. This transferred image is called the User's Logo screen.

The image you select as the User's Logo can be a photo, graphic, or company logo, which is useful in identifying the projector's owner to help deter theft. You can prevent changes to the User's Logo by setting up password protection for it.

Note: When you copy the menu settings from one projector to another using the batch setup feature, the user logo is also copied. Do not include any information in the user logo that you do not want to share between multiple projectors.

1. Display the image you want to project as the User's Logo.
2. Press the **Menu** button, select the **Extended** menu, and press **Enter** (↵).

3. Select the **User's Logo** setting and press **Enter** (↵).
You see a prompt asking if you want to use the displayed image as a user's logo.
4. Select **Yes** and press **Enter** (↵).
You see a selection box overlaying your image.

Note: When you select **User's Logo**, adjustments such as **Keystone** or **Aspect** are temporarily canceled.

5. Use the arrow buttons on the remote control to surround the image area you want to use as the User's Logo and press **Enter** (↵).
You see a prompt asking if you want to select this image area.

6. Select **Yes** and press **Enter** (↵). (If you want to change the selected area, select **No**, press **Enter** (↵), and repeat the last step.)

You see the User's Logo zoom factor menu.

7. Select a zoom percentage and press **Enter** (↵).

You see a prompt asking if you want to save the image as the User's Logo.

8. Select **Yes** and press **Enter** (↵).

You see a completion message.

9. Press **Esc** to exit the message screen.

10. Select the **Extended** menu and press **Enter** (↵).

11. Select **Display** and press **Enter** (↵).

12. Select when you want to display the User's Logo screen:

- To display it whenever there is no input signal, select **Display Background** and set it to **Logo**.
- To display it whenever you turn the projector on, select **Startup Screen** and set it to **On**.
- To display it whenever you press the **A/V Mute** button, select **A/V Mute** and set it to **Logo**.

To prevent anyone from changing the User's Logo settings without first entering a password, set a password and enable User's Logo security.

Copying Menu Settings Between Projectors

After you select menu settings for your projector, you can transfer them to another projector of the same model.

Note: Copy the projector's settings before you adjust the projected image using the projector's image adjustment settings. Any saved User's Logo setting on the projector will transfer to the other projector.

Caution: If the copy process fails due to a power failure, communication error, or for any other reason, Epson will not be responsible for any repair costs incurred.

The following settings will not transfer between projectors:

- Network menu settings other than those in the Notifications and Others menus

Note: In addition to the methods covered in this section, you can also copy and transfer settings to multiple projectors over a network using the EasyMP Network Updater software. See the online *EasyMP Network Updater Operation Guide* for instructions. You can download the latest software and documentation from the Epson website.

[Saving Settings to an SD Card](#)

[Transferring Settings from an SD Card](#)

[Additional Projector Software and Manuals](#)

Saving Settings to an SD Card

You can save the projector settings you want to transfer to an SD card.

Note: Use an empty SD card. If the card contains other files, the transfer may not complete correctly. The SD card cannot have any security features and must be an SDHC card of Class 10 or higher with a maximum capacity of 32GB, or an SD card formatted in FAT16 or FAT32.

1. Turn off the projector and unplug the power cord from the projector's power inlet.

2. Insert the SD card into the projector's card slot.

Note: Insert the SD card directly into the projector. Do not use a hub or your settings may not be saved correctly.

3. Press and hold the **Esc** button on the remote control as you connect the power cord to the projector's power inlet.

4. When the On/Standby and Status lights are blue, and the Laser and Temp lights are orange, release the **Esc** button.

The lights flash as settings transfer to the SD card. When the lights stop flashing, the On/Standby light turns blue and the projector enters standby mode.

Caution: Do not unplug the power cord or remove the SD card while the lights are flashing. This could damage the projector.

5. Once the projector enters standby mode, remove the SD card.

Parent topic: [Copying Menu Settings Between Projectors](#)

Transferring Settings from an SD Card

After saving projector settings to an SD card, you can transfer them to another projector of the same model.

Note: Make sure the SD card contains only one settings transfer file from another projector of the same model. The settings are contained in a file called **pjconfdata.bin**. If the drive contains other files, the transfer may not complete correctly.

Do not adjust image settings on a projector until after you transfer settings to it. Otherwise, you may have to repeat your adjustments.

1. Turn off the projector and unplug the power cord from the projector's power inlet.
2. Insert the SD card into the projector's card slot.

Note: Insert the SD card directly into the projector. Do not use a hub or your settings may not transfer correctly.

3. Press and hold the **Menu** button on the remote control as you connect the power cord to the projector's power inlet.

4. When the On/Standby and Status lights are blue, and the Laser and Temp lights are orange, release the **Menu** button.

The lights flash as settings transfer to the SD card. When the lights stop flashing, the On/Standby light turns blue and the projector enters standby mode.

Caution: Do not unplug the power cord or remove the SD card while the lights are flashing. This could damage the projector.

5. Once the projector enters standby mode, remove the SD card.

Using the Projector's Menus

You can use the projector's menus to adjust the settings that control how your projector works. The projector displays the menus on the screen.

1. Press the **Menu** button on the remote control.

You see the menu screen displaying the Image menu settings.

2. Press the up or down arrow button to move through the menus listed on the left. The settings for each menu are displayed on the right.

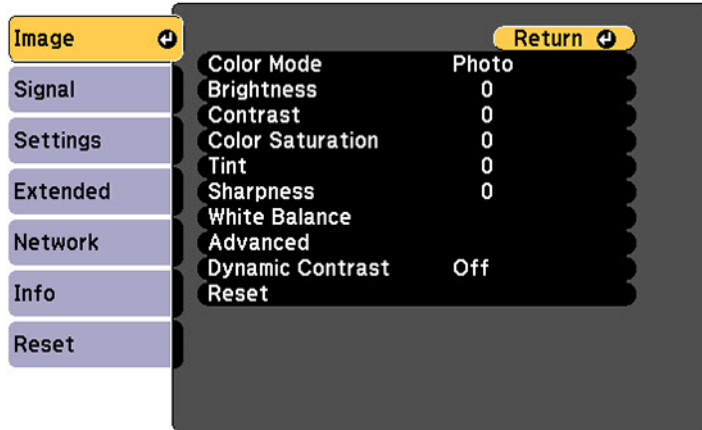

Note: The available settings depend on the current input source.

3. To change settings in the displayed menu, press **Enter** (↵).
4. Press the up or down arrow button to move through the settings.
5. Change the settings using the buttons listed on the bottom of the menu screens.
6. To return all the menu settings to their default values, select **Reset**.
7. When you finish changing settings on a menu, press **Esc**.
8. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Adjusting the Menu Settings](#)

Image Quality Settings - Image Menu

Settings on the Image menu let you adjust the quality of your image for the input source you are currently using. The available settings depend on the currently selected input source.

To change settings for an input source, make sure the source is connected and select that source.

Setting	Options	Description
Color Mode	See the list of available Color Modes	Adjusts the vividness of image colors for various image types and environments
Brightness	Varying levels available	Lightens or darkens the overall image
Contrast	Varying levels available	Adjusts the difference between light and dark areas of the image
Color Saturation	Varying levels available	Adjusts the intensity of the image colors
Tint	Varying levels available	Adjusts the balance of green to magenta tones in the image
Sharpness	Varying levels available	Adjusts the sharpness or softness of image details

Setting	Options	Description
White Balance	Color Temp. Customized	Sets the overall color tone of the image Color Temp.: sets the color temperature according to the selected color mode; lower values tint the image red, and higher values tint the image blue Customized: adjusts the individual RGB components of the offset and gain
Advanced	Gamma	Adjusts the colors by selecting one of the gamma correction values, referring to the projected image, or a gamma graph
Dynamic Contrast	Off Normal High Speed	Adjusts the projected luminance based on the image brightness when certain Color Modes are selected

Note: The **Brightness** setting does not affect laser brightness. To change the laser brightness mode, use the **Brightness Settings** setting in the Settings menu.

Parent topic: [Adjusting the Menu Settings](#)

Input Signal Settings - Signal Menu

Normally the projector detects and optimizes the input signal settings automatically. If you need to customize the settings, you can use the Signal menu. The available settings depend on the currently selected input source.

To change settings for an input source, make sure the source is connected and select that source.

Setting	Options	Description
Aspect	See the list of available aspect ratios	Sets the aspect ratio (width-to-height ratio) for the selected input source

Setting	Options	Description
Advanced	HDMI Video Range	<p>Sets the video range to match the setting of the device connected to the HDMI input port</p> <ul style="list-style-type: none"> • Auto: detects the video range automatically • Normal: normally for images from a device other than a computer; select if the black areas of the image are too bright • Expanded: normally for images from a computer; select if the image is too dark
Scale	Varying levels available	Adjusts the size and position of the image displayed by each projector when using multiple projectors to project one image

Parent topic: [Adjusting the Menu Settings](#)

Projector Feature Settings - Settings Menu

Options on the Settings menu let you customize various projector features.

Setting	Options	Description
Keystone	H/V Keystone Quick Corner	Adjusts image shape to rectangular (horizontally and vertically) H/V Keystone: lets you manually correct horizontal and vertical sides Quick Corner: select to correct image shape and alignment using an on-screen display
Volume	Varying levels available	Adjusts the volume of external speakers connected to the projector
Brightness Settings	Light Source Mode Brightness Level	Selects the brightness mode of the projector laser Light Source Mode: sets the brightness for the laser: <ul style="list-style-type: none"> • Normal: sets the maximum brightness level • Quiet: reduces laser brightness to 70% with reduced fan noise • Extended: reduces laser brightness to 70% and saves power and laser life • Custom: allows you to select a custom brightness level Brightness Level: allows you to select a custom brightness level
Remote Receiver	On Off	Turns off reception of remote control signals by the receiver To reset this setting to On , press and hold the Menu button for about 15 seconds.

Setting	Options	Description
User Button	Light Source Mode Multi-Projection Info Display the QR Code Messages Brightness Level	Assigns a menu option to the User button on the remote control for one-touch access
Test Pattern	—	Displays a test pattern to assist in focusing and zooming the image and correcting image shape
Content Playback	Overlay Effect SD Viewer	Selects playlists and effects for projection Overlay Effect: select On to apply Color Filter , Lightness , and Shape Filter settings. SD Viewer: select a playlist from the SD card

Parent topic: [Adjusting the Menu Settings](#)

Projector Setup Settings - Extended Menu

Settings on the Extended menu let you customize various projector setup features that control its operation.

Setting	Options	Description
Display	Messages Startup Screen Standby Confirmation Color Uniformity	Selects various display options Messages: controls whether messages are displayed on the screen Startup Screen: controls whether a special screen appears when the projector starts up Standby Confirmation: controls whether a confirmation screen appears when the projector is powered off Color Uniformity: adjusts the color tone balance
User's Logo	—	Creates a screen that the projector displays to identify itself and enhance security

Setting	Options	Description
Projection	Front Front/Ceiling Rear Rear/Ceiling	Selects the way the projector faces the screen so the image is oriented correctly
Operation	Direct Power On High Altitude Mode Auto Power On Indicators Startup Source HDMI EQ Setting Date & Time	Selects various operation options Direct Power On: lets you turn on the projector without pressing the power button High Altitude Mode: regulates the projector's operating temperature at altitudes above 4921 feet (1500 m) Auto Power On: if this is set to HDMI, the projector turns on when a signal is received from the HDMI port, even when the projector is in standby mode Indicators: turns the projector's lights on or off Startup Source: select the input source you want to display from when the projector is turned on HDMI EQ Setting: change the HDMI reception level of the video source connected to the HDMI port if there is no image or noise in the image Date & Time: adjusts the projector's date and time settings <ul style="list-style-type: none"> • Daylight Savings Time: enables daylight savings time • Internet Time: updates the time automatically via an online time server

Setting	Options	Description

Parent topic: [Adjusting the Menu Settings](#)

Projector Information Display - Info Menu

You can display information about the projector and input sources by viewing the Info menu. However, you cannot change any settings in the menu.

Select **Version** to display the projector's firmware version. Select **Light Source Info** to display the projector's light source information. Select **Projector Info** to display the settings described below.

Information item	Description
Operation Hours	Displays the number of hours (H) the projector has been used since it was turned on
Source	Displays the name of the port to which the current input source is connected
Input Signal	Displays the input signal setting of the current input source
Resolution	Displays the resolution of the current input source
Refresh Rate	Displays the refresh rate of the current input source
Sync Info	Displays information that may be needed by a service technician
Status	Displays information about projector problems that may be needed by a service technician
Serial Number	Displays the projector's serial number

Information item	Description
Event ID	Displays the Event ID number corresponding to a specific projector problem; see the list of Event ID codes

[Event ID Code List](#)

Parent topic: [Adjusting the Menu Settings](#)

Event ID Code List

If the **Event ID** option on the Info menu displays a code number, check this list of Event ID codes for the solution to the projector problem associated with the code.

Event ID code	Cause and solution
0432	The network software did not start. Turn the projector off and then on again.
0435	
0433	Cannot display the transferred images. Restart the network software.
0434	Unstable network communication. Check the network communication status, wait a few moments, and try connecting to the network again.
0481	
0482	
0485	
0484	Communication with computer was disconnected. Restart the network software.
0483	The network software quit unexpectedly. Check the network communication status, then turn the projector off and then on again.
04FE	
0479	A projector system error has occurred. Turn the projector off and then on again.
04FF	
0891	Cannot find the SSID (network name). Make sure your computer and projector are connected to your access point's current SSID.
0892	The WPA/WPA2 authentication type does not match. Make sure the wireless network security settings are correct.
0893	The WEP/TKIP encryption type does not match. Make sure the wireless network security settings are correct.

Event ID code	Cause and solution
0894	Communication with unauthorized access point was disconnected. Contact your network administrator.
0898	Failed to acquire DHCP address. Make sure the DHCP server is operating correctly. If you are not using DHCP, turn off the DHCP setting in the Network menus.
0899	A communication error has occurred. Try restarting the network software and restarting your projector. If that does not solve the problem, contact Epson for help.
089A	The EAP authentication type does not match the network. Check the wireless LAN security settings and make sure that the security certificate is installed correctly.
089B	EAP server authentication failed. Check the wireless LAN security settings and make sure that the security certificate is installed correctly.
089C	EAP client authentication failed. Check the wireless LAN security settings and make sure that the security certificate is installed correctly.
089D	Key exchange failed. Check the wireless LAN security settings and make sure that the security certificate is installed correctly.
0920	The internal battery that saves the projector's date and time settings is running low. Contact Epson for help.

Maintaining and Transporting the Projector

Follow the instructions in these sections to maintain your projector and transport it from place to place.

[Projector Maintenance](#)

[Replacing the Remote Control Batteries](#)

[Transporting the Projector](#)

Projector Maintenance

Your projector needs little maintenance to keep working at its best.

You may need to clean the lens periodically, and clean the air vents to prevent the projector from overheating due to blocked ventilation.

The only parts you should replace are the remote control batteries. If any other part needs replacing, contact Epson or an authorized Epson servicer.

This projector uses a sealed laser light source which does not need servicing and cannot be replaced.

Warning: Before cleaning any part of the projector, turn it off and unplug the power cord. Never open any cover on the projector, except as specifically explained in this manual. Dangerous electrical voltages in the projector can injure you severely.

Warning: Do not try to service this product yourself, except as specifically explained in this manual. Refer all other servicing to qualified servicers.

[Cleaning the Lens](#)

[Cleaning the Projector Case](#)

[Cleaning the Air Vents](#)

Parent topic: [Maintaining and Transporting the Projector](#)

Cleaning the Lens

Clean the projector's lens periodically, or whenever you notice dust or smudges on the surface.

- To remove dust or smudges, gently wipe the lens with a soft, lint-free cloth.

- To remove stubborn smudges, moisten a soft, lint-free cloth with lens cleaner and gently wipe the lens. Do not spray any liquid directly on the lens.

Warning: Do not use a lens cleaner that contains flammable gas. The high heat generated by the projector may cause a fire.

Caution: Do not use glass cleaner or any harsh materials to clean the lens and do not subject the lens to any impacts; you may damage it. Do not use canned air, or the gases may leave a residue. Avoid touching the lens with your bare hands to prevent fingerprints on or damage to the lens surface.

Cleaning the Projector Case

Before cleaning the projector case, turn off the projector and unplug the power cord.

- To remove dust or dirt, use a soft, dry, lint-free cloth.
- To remove stubborn dirt, use a soft cloth moistened with water and mild soap. Do not spray liquid directly on the projector.

Caution: Do not use wax, alcohol, benzine, paint thinner, or other chemicals to clean the projector case. These can damage the case. Do not use canned air, or the gases may leave a flammable residue.

Cleaning the Air Vents

Clean the projector's air vents if they get dusty, or if you see a message telling you to clean them.

1. Turn off the projector and unplug the power cord.

2. Gently remove the dust using a small vacuum designed for computers or a very soft brush (such as a paintbrush).

Caution: Do not use canned air. The gases may leave a flammable residue or push dust and debris into the projector's optics or other sensitive areas.

Replacing the Remote Control Batteries

The remote control uses two AA manganese or alkaline batteries. Replace the batteries as soon as they run out.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Remove the battery cover as shown.

2. Remove the old batteries.

Warning: If the battery fluid has leaked, wipe it away with a soft cloth and avoid getting the fluid on your hands. If it gets on your hands, wash them immediately to avoid injury.

3. Insert the batteries with the + and – ends facing as shown.

4. Replace the battery cover and press it down until it clicks into place.

Warning: Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

Parent topic: [Maintaining and Transporting the Projector](#)

Transporting the Projector

The projector contains precision parts, some of which are glass. Follow the guidelines here to transport, ship, or store the projector safely.

1. Remove any equipment connected to the projector.
2. Remove the SD card, if necessary.
3. Tighten the ball joint screw completely to prevent the projector from moving during transportation.
4. Do one of the following:
 - When transporting the projector a long distance or as checked luggage, pack it in a firm box with cushioning around it and mark the box "Fragile."
 - When shipping the projector for repairs, place it in its original packing materials, if possible, or use equivalent materials with cushioning around the projector. Mark the box "Fragile."

Note: Epson shall not be liable for any damages incurred during transportation.

Projection Problem Tips

If the projector is not working properly, try turning it off and unplugging it. Then plug it back in and turn it on.

If this does not solve the problem, check the following:

- The lights on the projector may indicate what the problem is.
- The solutions in this manual can help you solve many problems.

If none of these solutions help, you can contact Epson for technical support.

Projector Light Status

The lights on the projector indicate the projector status and let you know when a problem occurs. Check the status and color of the lights and look for a solution in the tables here.

- 1 On/Standby light
- 2 Status light
- 3 Laser light
- 4 Temp (temperature) light
- 5 Wireless LAN light

On/Standby light	Status light	Laser light	Temp light	Status and solution
Blue	Blue	Varies	Off	Normal operation.
Blue	Off	Off	Off	Standby, sleep mode, or monitoring.
Blue	Flashing blue	Off	Off	Warming up. Wait for an image to appear.
				Shutting down. (When the Status light stops flashing, you can unplug the projector.)
Flashing blue	Off	Off	Off	Preparing for monitoring; all features are disabled.
Blue	Blue	Off	Off	A/V Mute is on.

On/Standby light	Status light	Laser light	Temp light	Status and solution
Varies	Flashing blue	Flashing orange	Varies	Refresh Mode is on. Press any button to turn Refresh Mode off.
Off	Flashing blue	Flashing orange	Off	Internal projector error. Turn the projector off, unplug it, and contact Epson for help.
Off	Flashing blue	Off	Flashing orange	A fan or sensor has a problem. Turn the projector off, unplug it, and contact Epson for help.
Off	Flashing blue	Off	Orange	<p>Projector has overheated and turned off. Leave it turned off to cool down. After about five minutes, do the following:</p> <ul style="list-style-type: none"> • Make sure that the vents are not clogged with dust or obstructed by nearby objects. • If operating the projector at high altitude, turn on High Altitude Mode. • If the problem persists, unplug the projector and contact Epson for help.
Off	Flashing blue	Orange	Off	<p>Laser has a problem.</p> <ul style="list-style-type: none"> • Make sure that the vents are not clogged with dust or obstructed by nearby objects. • If the problem persists, unplug the projector and contact Epson for help.

On/Standby light	Status light	Laser light	Temp light	Status and solution
Blue	Varies	Varies	Flashing orange	Projector is too hot. <ul style="list-style-type: none"> • Make sure that the vents are not clogged with dust or obstructed by nearby objects. • Make sure the environmental temperature is not too hot. • If the problem persists, unplug the projector and contact Epson for help.
Flashing blue	Varies	Flashing orange	Varies	Laser warning. Turn the projector off, unplug it, and contact Epson for help.

Wireless LAN light	Status and solution
Blue	Wireless LAN is available.
Flashing blue quickly	Connecting to device.
Flashing blue slowly	An error has occurred. Turn the projector off and back on again.
Off	Wireless LAN is unavailable. Make sure the wireless LAN settings are correct.

Note: If the lights display a pattern not listed in the tables above, turn the projector off, unplug it, and contact Epson for help.

Solutions When No Image Appears

If no image appears, try the following solutions:

- Press the **A/V Mute** button on the remote control to see if the image was temporarily turned off.
- Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.
- Press the projector's power button to wake it from standby or sleep mode. Also see if your connected computer is in sleep mode or displaying a blank screen saver.
- Press the **Menu** button. If the projector menu is able to display, there may be a problem with the connected video source, cable connection, or port.
- Check the settings on the Signal menu to make sure they are correct for the current video source.
- Make sure the **Light Source Calibration** options in the Reset menu are set correctly.
- Check the **Display** setting to make sure **Messages** is set to **On**.
- If the projector does not respond when you press buttons on the remote control, make sure the remote receivers are turned on.
- For images projected with Windows Media Center, reduce the screen size from full screen mode.
- For images projected from applications using Windows DirectX, turn off DirectX functions.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.

- The projector may not be able to project copyrighted videos that you play back on a computer. For details, see the manual supplied with your computer.
- If you are projecting from the SD card, press one of the favorite playlist numbers on the remote control to display the image.
- If the other solutions do not solve the problem, reset all of the projector settings using the options on the **Reset** menu.

Solutions When "No Signal" Message Appears

If the "No Signal" message appears, try the following solutions:

- Press one of the source buttons (**Spotlight**, **HDMI**, **LAN**, or **SD**) on the remote control to switch to the correct image source, if necessary.
- Turn on the connected computer or video source, and press its play button to begin your presentation, if necessary.
- Check the connection from the projector to your video sources.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
- If necessary, turn the projector and the connected computer or video source off and then on again.
- Check that the SD card is inserted correctly.
- If the other solutions do not solve the problem, reset all of the projector settings using the options on the **Reset** menu.

Displaying From a PC Laptop

If you see the "No Signal" message when you display from a PC laptop, you need to set up the laptop to display on an external monitor.

1. Hold down the laptop's **Fn** key and press the key labeled with a monitor icon or **CRT/LCD**. (See your laptop manual for details.) Wait a few seconds for an image to appear. To display on both the laptop's monitor and the projector, try pressing the same keys again.

Note: On Windows 7 or later, hold down the Windows key and press **P** at the same time, then click **Duplicate**.

2. If the same image is not displayed by the laptop and projector, check the Windows **Display** utility to make sure the external monitor port is enabled and extended desktop mode is disabled. (See your computer or Windows manual for instructions.)
3. If necessary, check your video card settings and set the multiple display option to **Clone**, **Mirror**, or **Duplicate**.

Parent topic: [Solutions When "No Signal" Message Appears](#)

Displaying From a Mac Laptop

If you see the "No Signal" message when you display from a Mac laptop, you need to set up the laptop for mirrored display. (See your laptop manual for details.)

1. Open the **System Preferences** utility and select **Displays**, **Display**, or **Color LCD**.
2. Click the **Arrange** or **Arrangement** tab.
3. Select the **Mirror Displays** checkbox.

Parent topic: [Solutions When "No Signal" Message Appears](#)

Solutions When "Not Supported" Message Appears

If the "Not Supported" message appears, try the following solutions:

- Make sure the input signal is supported by the projector.
- Make sure the computer's display resolution does not exceed the projector's resolution and frequency limit. If necessary, select a different display resolution for your computer. (See your computer manual for details.)
- As a test, try setting the computer's display resolution to the lowest possible setting, and then gradually increase it as necessary.

Solutions When Only a Partial Image Appears

If only a partial computer image appears, try the following solutions:

- Make sure the **Scale** setting in the Extended menu is turned off.
- Select a different image aspect ratio in the Signal menu.
- Check the cables connecting the computer or video source to the projector. Try connecting different cables.
- Check your computer display settings to disable dual display and set the resolution within the projector's limits. (See your computer manual for details.)
- Check the resolution assigned to your presentation files to see if they are created for a different resolution than you are projecting in. (See your software help for details.)
- Make sure you selected the correct **Projection** setting.
- If you are passing the video signal through another device, make sure the device is set up correctly, then try connecting the video source directly to the projector.
- Make sure the **Light Source Calibration** options in the Reset menu are set correctly.

Solutions When a Playlist Does Not Play

If a playlist on the SD card does not play, try the following solutions:

- Make sure you saved the playlist to the SD card.
- Make sure the SD card is inserted correctly into the projector.
- Make sure the SD card is not write-protected.
- Make sure the file type on the SD card is supported.

- Make sure you use SDHC cards of Class 10 or higher with a maximum of 32 GB or SD cards in FAT16 or FAT32 format.

Note: See the *Epson Projector Content Manager Operation Guide* for details.

Related tasks

[Inserting an SD Card](#)

Solutions When the Image Contains Noise or Static

If the projected image seems to contain electronic interference (noise) or static, try the following solutions:

- Check the cables connecting your computer or video source to the projector. They should be:
 - Separated from the power cord to prevent interference
 - Securely connected at both ends
 - Not connected to an extension cable
 - No longer than 10 feet (3 m) for VGA/computer cables or 24 feet (7.3 m) for HDMI cables
- Make sure the SD card is inserted correctly.
- Check the settings on the projector's Signal menu to make sure they match the video source.
- Select a computer video resolution and refresh rate that are compatible with the projector.

Solutions When the Image is Fuzzy or Blurry

If the projected image is fuzzy or blurry, try the following solutions:

- Adjust the image focus.

- Check the lens for condensation.

Note: To avoid condensation on the lens after bringing the projector in from a cold environment, let the projector warm up to room temperature before using it.

- Verify that the throw distance from the projector to your projection surface meets the specifications in the *Installation Guide* included with your mount.
- If you are projecting from a computer, adjust the computer's resolution to match the projector's native resolution, if possible.

Solutions When the Image Brightness or Colors are Incorrect

If the projected image is too dark or light, or the colors are incorrect, try the following solutions:

- Check your video source settings.
- Make sure the SD card is inserted correctly.
- Adjust the available settings on the Image menu for the current input source, such as **Brightness**, **Contrast**, **Tint**, **Advanced**, and **Color Saturation**.
- Make sure all the cables are securely connected to the projector and your video device. If you connected long cables, try connecting shorter cables.
- Make sure the **Brightness Settings** options in the Settings menu are set correctly.
- Position the projector close enough to the screen.

Solutions to Sound Problems

If there is no sound from the external speaker when you expect it or the volume is too low or high, try the following solutions:

- Adjust the projector's volume settings.
- Make sure external speakers are connected.
- Press the **A/V Mute** button on the remote control to resume video and audio if they were temporarily stopped.
- Check the audio out cable connection between the projector and your external speakers.
- Make sure any connected audio cables are labeled "No Resistance".
- If you are using a Mac and you do not hear sound from an HDMI source, make sure your Mac supports audio through the HDMI port. If not, you need to connect an audio cable directly to your speaker system.
- HDMI audio is only supported using PCM. Make sure your audio source is set to the PCM setting.
- If you turn the projector on immediately after turning it off, the cooling fans may run at high speed momentarily and cause an unexpected noise. This is normal.

Solutions to Projector Power or Shut-Off Problems

If the projector does not come on when you press the power button or it shuts off unexpectedly, try the following solutions:

- Make sure the power cord is securely connected to the projector and to a working electrical outlet.
- The projector's buttons may be locked for security. Unlock the buttons or use the remote control to turn on the projector.
- If the projector's light source shuts off unexpectedly, it may have entered standby mode after a period of inactivity. Press the power button to wake the projector and adjust the **Sleep Mode Timer** setting to change the sleep interval.
- If the projector is installed on a lighting track, disconnect it from the lighting track and plug it into a power outlet to make sure it is working.
- If the projector's light source shuts off, the Status light is flashing blue, and the Temp light is orange, the projector has overheated and shut off. Check the solutions for this light status.
- If the power button on the remote control does not turn on the projector, check its batteries and make sure the **Remote Receiver** setting is turned on in the projector's menu, if available.
- If the remote receiver setting is off, press and hold the **Menu** button on the remote for at least 15 seconds to restore the default setting.
- The power cord may be defective. Try another power cord. If that doesn't work, disconnect the cord and contact Epson.

Solutions to Problems with the Remote Control

If the projector does not respond to remote control commands, try the following solutions:

- Check that the remote control batteries are installed correctly and have power. If necessary, replace the batteries.
- Make sure you are operating the remote control within the reception angle and range of the projector.
- Make sure the projector is not warming up or shutting down.
- Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote control up.

- Strong fluorescent lighting, direct sunlight, or infrared device signals may be interfering with the projector's remote receivers. Dim the lights or move the projector away from the sun or interfering equipment.
- If available, turn on the remote receiver in the projector's menu system, or check if the remote receiver was turned off.
- If the remote receiver setting is off, press and hold the **Menu** button on the remote for at least 15 seconds to restore the default setting.
- If you lose the remote control, you can purchase another from an authorized Epson reseller.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems with your projector. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday and 7 AM to 4 PM, Pacific Time, Saturday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Before you call, have the following information ready:

- Product name
- Product serial number (located on the bottom or rear of the projector, or in the menu system)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer or video configuration
- Description of the problem

Purchase Supplies and Accessories

You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

To purchase a replacement remote control, call (562) 276-4394 (U.S.) or (905) 709-3839 (for dealer referral in Canada).

Supported Video Display Formats

For best results, your computer's monitor port or video card resolution should be set to display in the projector's native resolution. However, your projector includes Epson's SizeWise chip that supports other computer display resolutions, so your image will be resized to fit automatically.

Your computer's monitor port or video card refresh rate (vertical frequency) must be compatible with the projector. (See your computer or video card manual for details.)

The table here lists the compatible refresh rate and resolution for each compatible video display format.

Display format	Refresh rate (in Hz)	Resolution (in pixels)
Computer signals (analog RGB)		
VGA	60	640 × 480
SVGA	60	800 × 600
XGA	60	1024 × 768
WXGA	60	1366 × 768
	60	1280 × 800
WXGA+	60	1440 × 900
WXGA++	60	1600 × 900
SXGA	60	1280 × 960
	60	1280 × 1024
SXGA+	60	1400 × 1050
WSXGA+	60	1680 × 1050
UXGA	60	1600 × 1200
WUXGA (Reduced Blanking)	60	1920 × 1200
HDMI input signals		
SDTV (480i/480p)	60	720 × 480
SDTV (576i/576p)	50	720 × 576
HDTV (720p)	50/60	1280 × 720
HDTV (1080i)	50/60	1920 × 1080
HDTV (1080p)	24/30/50/60	1920 × 1080

Recycling

Epson offers a recycling program for end of life products. Please go to [this site](#) for information on how to return your products for proper disposal.

Parent topic: [Notices](#)

Important Safety Information

Caution: Never look into the projector lens when the laser is turned on; the bright light can damage your eyes. Never let children look into the lens when it is on. Never open the projector case. Dangerous electrical voltages inside the projector can severely injure you. Except as specifically explained in this *User's Guide*, do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

Warning: The projector and its accessories come packaged in plastic bags. Keep plastic bags away from small children to avoid any risk of suffocation.

Parent topic: [Notices](#)

Laser Safety Information

This projector is a Class 2 laser product that complies with the IEC/EN60825-1:2007 international standard for lasers. Follow these safety instructions when using the projector.

Warning: Possibly hazardous optical radiation is emitted from this product. Do not look at the operating light source. Eye injury may result.

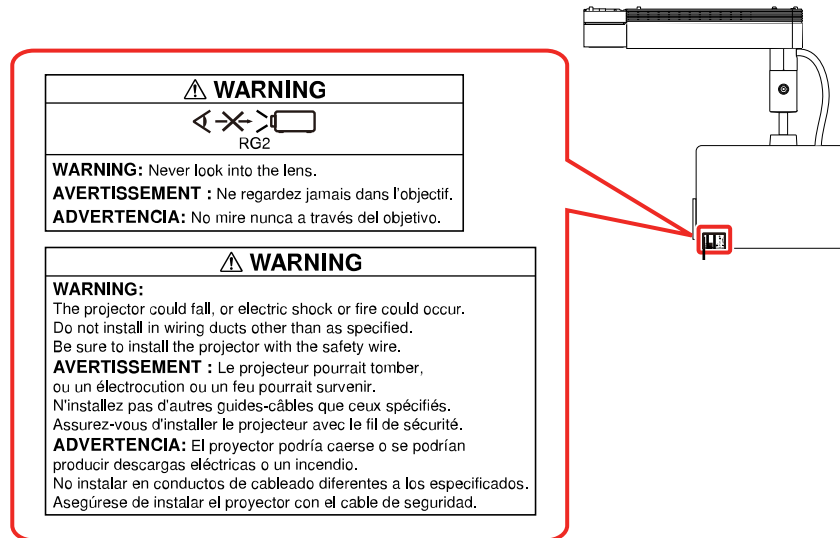

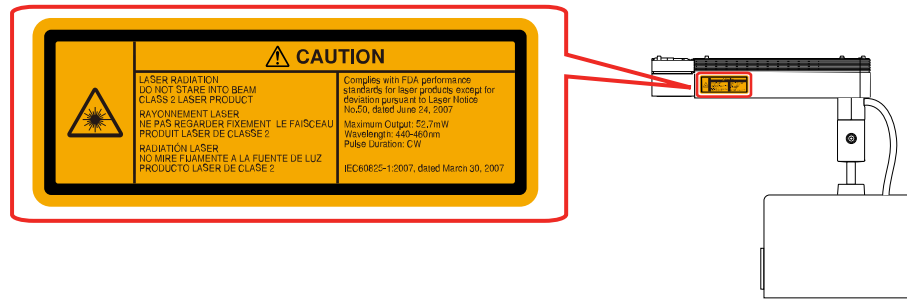

- If an error occurs with the projector, turn off the power and unplug the projector immediately. Continuing to use the projector could result in an electric shock, fire, or visual impairment. Contact Epson support.
- Do not open the projector case or attempt to disassemble or modify the projector. The projector contains a high-power laser component. Serious injury could result.
- Do not look into the lens during projection. Also, do not look into the lens using optical devices, such as a magnifying glass or telescope. This could cause visual impairment.
- When turning on the projector at a distance using the remote control, make sure no one is looking into the lens.
- Do not allow small children to operate the projector.
- Do not apply optical devices, such as a magnifying glass or reflector, to the projected image. This may result in physical harm, fire, or other damage.
- Do not block the light from the lens during projection. The high temperature in this area could cause burns, fire, or other damage. The lens may overheat due to the reflected light and could cause the projector to malfunction.
- Before using the projector, make sure nothing could reflect the projected image.
- When disposing of the projector, do not disassemble it. Dispose of the projector in accordance with local regulations.

Labels are attached to the projector to indicate it is a Class 2 laser product and complies with FDA performance standards for laser products except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007:

- **Inside**

- Side

Important Safety Instructions

Follow these safety instructions when setting up and using the projector:

- Do not look into the lens when the projector is on. The bright light can damage your eyes. Avoid standing in front of the projector so the bright light does not shine into your eyes.

- Do not place the projector on an unstable cart, stand, or table. If the projector is placed on the floor or another flat surface, the optional floor stand should be installed to prevent the projector from tipping over.
- When installing or adjusting the direct mount, do not use adhesives to prevent the screws from loosening and do not use oils or lubricants. This may cause the projector case to crack and the projector to fall from its mount. This could cause serious injury to anyone under the mount and could damage the projector.
- If the projector is mounted on a ceiling or wall, it should be installed by qualified technicians using mounting hardware designed for use with this projector.
- Do not install the projector in wiring ducts other than as specified.
- If the projector is mounted overhead, make sure to install the included safety wire to prevent the projector from falling. This could cause serious injury to anyone under the mount and could damage the projector.
- When adjusting the orientation of the projector, make sure that the projected light does not shine on the power unit. This may cause the projector to overheat and serious injury or fire may occur.
- Do not use the projector near water, sources of heat, high-voltage electrical wires, or sources of magnetic fields.
- Use the type of power source indicated on the projector. Use of a different power source may result in fire or electric shock. If you are not sure of the power available, consult your dealer or power company.
- If you use the projector in a country other than where you purchased it, use the correct power cord for that country.
- Take the following precautions when handling the plug: Do not hold the plug with wet hands. Do not insert the plug into a dusty outlet. Insert the plug firmly into the outlet. Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it. Do not overload wall outlets, extension cords, or power strips. Failure to comply with these precautions could result in fire or electric shock.
- Do not place the projector where the cord can be walked on. This may result in fraying or damage to the plug.
- Do not modify the power cord. Do not place heavy objects on top of the power cord or bend, twist, or pull it excessively. Keep the power cord away from hot electrical appliances.
- Do not tie the power cord and other cables together. This could cause fire or electric shock.
- Unplug the projector from the wall outlet and refer servicing to qualified service personnel under the following conditions: if it does not operate normally when you follow the operating instructions, or exhibits a distinct change in performance; if smoke, strange odors, or strange noises come from the projector; if the power cord or plug is damaged or frayed; if liquid or foreign objects get inside the

projector, or if it has been exposed to rain or water; if it has been dropped or the housing has been damaged.

- Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.
- Unplug the projector when it will not be used for extended periods.
- Unplug the projector from the wall outlet and allow to cool before cleaning. Use a dry cloth (or, for stubborn dirt or stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid or aerosol cleaners, any sprays containing flammable gas, or solvents such as alcohol, paint thinner, or benzene.
- Do not use the projector where it may be exposed to rain, water, or excessive humidity.
- Do not use or store the projector where it may be exposed to smoke, steam, corrosive gases, excessive dust, vibration, or shock.
- Do not use the projector where flammable or explosive gases may be present.
- Do not use or store the projector or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.
- Do not use the projector outside of the required temperature range below:

41 to 104 °F (5 to 40 °C)

Doing so may cause an unstable display and could lead to projector damage. Do not use or store the projector where it may be exposed to sudden changes in temperature.

- Do not block the slots and openings in the projector case. They provide ventilation and prevent the projector from overheating. If you are setting up the projector near a wall, leave at least 11.8 inches (30 cm) of space between the wall and the projector.
- If you are using two or more projectors side-by-side, leave at least 20 inches (50 cm) of space between the projectors to allow for proper ventilation.
- If you are using the projector at an altitude that exceeds 4,921 feet (1,500 m), make sure to set the **High Altitude Mode** setting to **On**.
- Do not operate the projector in a closed cabinet unless proper ventilation is provided.
- Do not block the lens during projection using a book or any other object, especially flammable objects. This could damage the projector or cause a fire.
- Do not touch the lens with your fingers. Doing so may leave a residue on the lens and cause projection quality to deteriorate.
- Do not store the projector outside of the required temperature range of 14 to 140 °F (–10 to 60 °C) or in direct sunlight for long periods of time. Doing so may cause damage to the case.
- When storing the projector, remove the batteries from the remote control.

- Do not place anything that can become warped or damaged by heat near the exhaust vents. Do not bring your hands or face close to the vents while projection is in progress. Do not bring your face close to the projector while it is in use.
- Do not place your hand or any object near the air exhaust vent. The high temperature could cause burns, fire, or other damage.
- Do not place the source of an open flame, such as a lit candle, on or near the projector.
- Never allow objects of any kind to enter any openings in the projector. Do not leave objects, especially flammable objects, near the projector. Never spill liquid of any kind into the projector.
- You may need to clean the air intake or exhaust vent. A clogged air vent can block ventilation needed to cool the projector. Do not use canned air, or the gases may leave a residue.
- Before you move the projector, turn off the power, unplug the power cable from the outlet, and disconnect all cables.
- Except as specifically explained in this manual, do not attempt to service this product yourself. Refer all servicing to qualified personnel. Opening or removing the projector case may expose you to dangerous voltages and other hazards.

[Restriction of Use](#)

Parent topic: [Notices](#)

Restriction of Use

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive; disaster prevention devices; various safety devices; or functional/precision devices, you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability.

Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care, please make your own judgment on this product's suitability after a full evaluation.

List of Safety Symbols

The following table lists the meaning of the safety symbols labeled on the equipment.

No.	Symbol	Approved Standards	Description
1		IEC60417 No.5007	"ON" (power) To indicate connection to the mains.
2		IEC60417 No.5008	"OFF" (power) To indicate disconnection from the mains.
3		IEC60417 No.5009	Stand-by To identify the switch or switch position by means of which part of the equipment is switched on in order to bring it into the stand-by condition.
4		ISO7000 No.0434B, IEC3864-B3.1	Caution To identify general caution when using the product.
5		IEC60417 No.5041	Caution, hot surface To indicate that the marked item can be hot and should not be touched without taking care.
6		IEC60417 No.6042 ISO3864-B3.6	Caution, risk of electric shock To identify equipment that has risk of electric shock.
7		IEC60417 No.5957	For indoor use only To identify electrical equipment designed primarily for indoor use.

No.	Symbol	Approved Standards	Description
8		IEC60417 No.5926	Polarity of DC power connector To identify the positive and negative connections (the polarity) on a piece of equipment to which a DC power supply may be connected.
9		—	Polarity of DC power connector To identify the positive and negative connections (the polarity) on a piece of equipment to which a DC. power supply may be connected.
10		IEC60417 No.5001B	Battery, general On battery powered equipment. To identify a device for instance a cover for the battery compartment, or the connector terminals.
11		IEC60417 No.5002	Positioning of cell To identify the battery holder itself and to identify the positioning of the cell(s) inside the battery holder.
12		—	Positioning of cell To identify the battery holder itself and to identify the positioning of the cell(s) inside the battery holder.
13		IEC60417 No.5019	Protective earth To identify any terminal which is intended for connection to an external conductor for protection against electric shock in case of a fault, or the terminal of a protective earth electrode.
14		IEC60417 No.5017	Earth To identify an earth (ground) terminal in cases where neither the symbol No.13 is explicitly required.

No.	Symbol	Approved Standards	Description
15		IEC60417 No.5032	Alternating current To indicate on the rating plate that the equipment is suitable for alternating current only; to identify relevant terminals.
16		IEC60417 No.5031	Direct current To indicate on the rating plate that the equipment is suitable for direct current only; to identify relevant terminals.
17		IEC60417 No.5172	Class II equipment To identify equipment meeting the safety requirements specified for Class II equipment according to IEC 61140.
18		ISO 3864	General prohibition To identify actions or operations that are prohibited.
19		ISO 3864	Contact prohibition To indicate injury that could occur due to touching a specific part of the equipment.
20		—	Never look into the optical lens while the projector is on.
21		—	To indicate that the marked item don't place anything on projector.
22		ISO3864 IEC60825-1	Caution, laser radiation To indicate the equipment has a laser radiation part.

No.	Symbol	Approved Standards	Description
23		ISO 3864	Disassembly prohibition To indicate a risk of injury, such as electric shock, if the equipment is disassembled.
24		IEC60417 No. 5266	Standby, partial standby To indicate that part of the equipment is in the ready status.
25		ISO3864 IEC60417 No. 5057	Caution, movable parts To indicate that you must keep away from movable parts according to protection standards.
26		—	Never look into the lens while the LED for lighting is on.
27		IEC60417-6056	Caution, moving fan blades To indicate that you must keep away from moving fan blades.
28		IEC60417-6043	Caution, sharp corners To indicate that you must not touch sharp corners.
29		—	To indicate that looking into the lens while projecting is prohibited.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

For Canadian Users

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson

also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. **ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.**

Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days, you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way, Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAlegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at <http://www.jamsadr.com> or by calling

1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at <http://www.jamsadr.com> ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks \$75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you \$1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if

any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. **The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.**
