2020 Lighting Control Products Catalog

interactive-online.com

About Us

Since 1996, Interactive Technologies has been guided by an unwavering commitment to high quality, cost effective entertainment and architectural lighting control solutions.

For us, the customer always comes first. Our next project is your next project.

No matter the size or scope, we will be there with solutions and support designed just for you.

What you're saying about us

"Thanks again for all the time and effort. We are extremely grateful for all your input and for being so available when we needed your help!"
- Jim Archard, Ward's Marine Electric

"Thank you so much for helping us out in a pinch. I can't thank you enough for the professional approach on the whole project."
- Lance Hutchinson, Vice President, Alpha Video

"This project with Interactive Technologies has really been very pleasant ... your team have been rock stars from start to finish."
- Kevin Snow, Creative Director, Luci Creative

"Thank you once again for the new firmware! I can't believe how quickly you were able to solve this issue."
- Matt Klasmeier, Vincent Lighting Systems

We're proud of what you do with our products...

National Geographic Experience: Ocean Odyssey
A "deeply immersive" entertainment experience in Times Square powered by three CueServer 2 Pro units

Empire State Building
CueServer 2 is responsible for the general lighting and media server handoff in the main lobby of this iconic building

Dollywood's LumiNights
CueServer 2 drives an impressive 30 universes of DMX in a park-wide lighting spectacular

Journey of Lights Parade
A massive installation of 124 CueServers on 8 floats and 60 costumes using 868 universes of DMX to perfectly synchronize more than a half-million lights to a coordinated musical soundtrack

Jack Chow Building
Recipient of the Live Design Award for Excellence in Architainment, this world famous building in Vancouver uses a CueServer 2 DIN to play nightly multimedia shows

Royal Caribbean's Oasis Class
The largest cruise ships in the world, Oasis, Allure, Harmony, and Symphony each have a package of over 20 CueServers on board, operating everything from poolside lighting to nightclubs

CueServer™

Advanced Lighting Control Platform for Entertainment and Architecture

A World of Possibilities...

At its heart **CueServer** is an advanced lighting control processor, but with its broad set of amazing capabilities, it can easily become the center of your project's "universe".

Entertainment Lighting
Record and play back complex shows full of color and movement

Internet of Things
React to real-world events and control things via the Internet

Conventional Lighting
Control up to 16,384 lighting channels via DMX or Ethernet

Building Automation
Manage architectural lighting with presets, zones and room combine

Wall Stations
Add button stations and touchscreens anywhere you need them

Cross-Platform
Program CueServer from both Mac and Windows

Mobile Devices
Create touchscreen interfaces for iOS, Android, Mac, Windows or Linux

Worldwide
Monitor and control CueServer from virtually anywhere around the world

3rd Party Integration
Interface directly with popular automation and show control systems

CueServer™

Advanced Lighting Control Platform for Entertainment and Architecture

MEET THE FAMILY...

Several CueServer processors are available to perfectly fit your project's needs. Choose to rack-mount, surface mount, or DIN-mount.

CueServer 2 Processors

CS-900
CueServer 2 Pro Rack-Mount

CS-920
CueServer 2 Mini

CS-950
CueServer 2 DIN-Rail

Original CueServer Processors

CS-800
CueServer Rack-Mount

CS-810
CueServer Mini

FEATURES AT A GLANCE

- Self Contained
- Architectural Processor
- Show Playback
- Cues, Presets, and Streams
- Large Channel Capabilities
- Multiple Timelines

Note: Not all CueServer models support all functions or capacities, please check product specifications for details. CueServer 2 functions as of software version 4.0. CueServer 1 functions as of software version 5.2. [1] Capacity may be limited by available memory card space. [2] Base models start with 2 universes licensed, CS-920 starts with 1 universe licensed, additional universe licenses may be purchased. [3] Up to 128 universes of supported Ethernet protocols within a maximum of 16,384 channels. [4] Number of playbacks times number of universes of channels must be 32 or less.

CueServer™

Advanced Lighting Control Platform for Entertainment and Architecture

INSANELY GREAT FEATURES...

CueServer delivers a world-class experience at every turn. Here are just a few of the stand-out features that make CueServer an award-winning lighting control platform.

Bring Your Own Device

With the power of **Web Stations**, you can create and publish your touchscreen designs on nearly any device including iOS, Android, Mac, Windows, or Linux. In the same building or across the planet, your virtual touchscreens provide live and responsive control of your system.

Add More Skills

A growing catalog of **Plugins** continue to add to CueServer's capabilities. Just drag-and-drop a Plugin into your project and like magic, CueServer suddenly learns new skills. Need to run cues that are based on current weather conditions? Want presets to trigger both DMX lighting as well as Hue scenes? Need to integrate with Lutron? Plugins are the answer.

| AccuWeather | Lutron QS | Philips Hue | Rapix DALI | Somfy ILT2 | IFTTT |
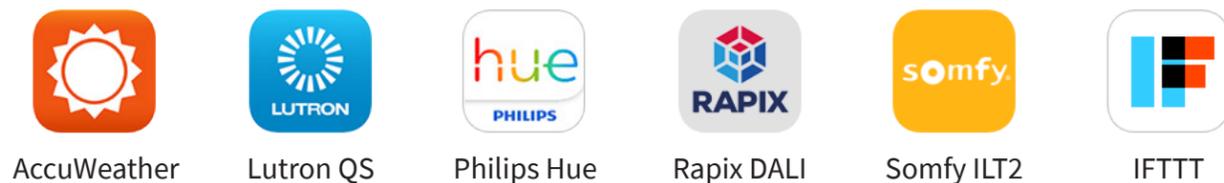

EASY TO PROGRAM...

Make amazing things with just a few clicks!

CueServer Studio

Use the powerful **CueServer Studio** software to capture scenes, setup timers, define rules, add audio and web resources, build scripts, and define presets. **CueServer Studio** runs natively on both Mac and Windows computers.
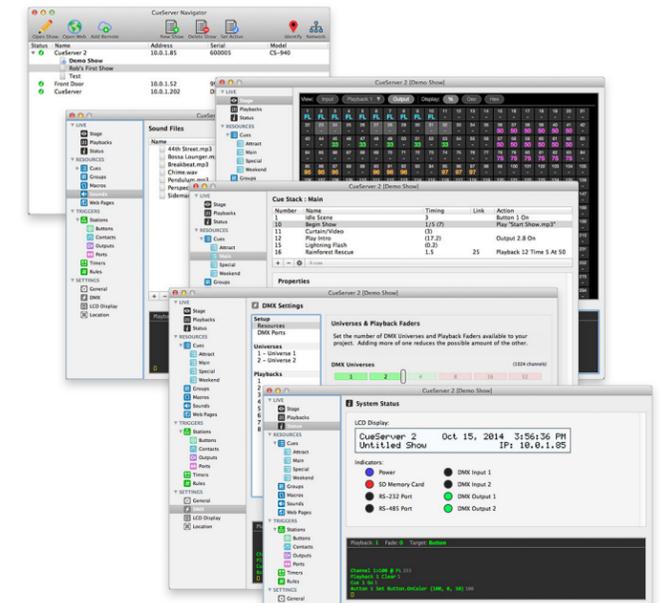

Programming That Makes Sense

With **CueServer Studio**, programming complex logic doesn't require a degree. Choose options from a simple *rule builder*. It's that easy.

WHENEVER This Button Is Pressed
AND The Hour Is After 3 PM
THEN Activate Preset 1
THEN Set Indicator 5 to ON

Get Creative

CueServer Studio includes a built-in graphical design tool that makes it easy to create fully interactive touchscreens. Add buttons, sliders, color wheels, and more.

CueServer™

Advanced Lighting Control Platform for Entertainment and Architecture
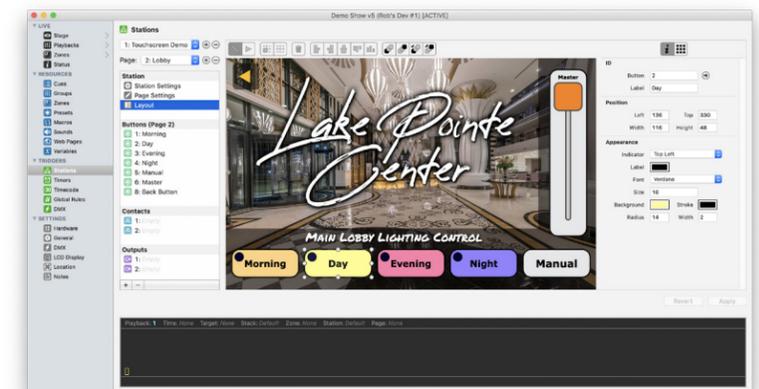

Thoughtful Design...

Modular DMX Ports

One size doesn't fit all. Both **CueServer 2 Pro** and **CueServer 2 Mini** have an innovative DMX Port design which allows the installer to choose from seven different connector modules depending on the job.

RJ45 Ethercon®

3-pin XLR Female

3-pin XLR Male

IDC Terminal Block

5-pin XLR Female

7 Optional Modules to Choose From

5-pin XLR Male

Screw Terminal Block

Customizable Key Caps

The **CueServer 2 Pro** features eight customizable RGB backlit function buttons. Optional blank key caps allow system installers to print and insert button legends that are custom tailored to each project.

Finishing Touches...

For a complete lighting control system, you may need wall stations and apps. We have that.

Insite Touchscreen

Our **Insite** 7" touchscreen is designed to work perfectly with CueServer. Every design element of Insite is uncompromising. Minimalist, but rugged, it is suited to complement any decor.

Insite 7" Touchscreen

CueStation

Available in two styles, four colors, and many configurations, these simple but effective button stations become an integral part of your CueServer project. Activate presets, start shows, change colors. Trigger anything CueServer can do.
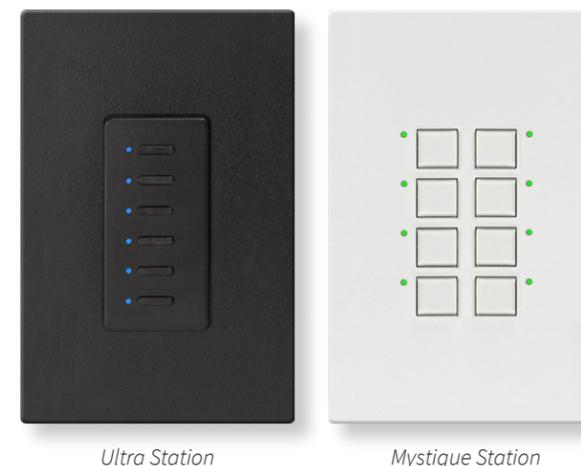

Apps

Using the powerful Web Station feature of CueServer, nearly any mobile device can instantly become part of your project.

Testimonials...

Here's what our customers have to say about CueServer.

"You have built an amazing product and a team that's very proud of it - gives us a ton of confidence our choice to use CueServer is the right one!"
        - David Coulter, Carvana

"I'm a huge fan of this piece of gear."
        - Derek Barnwell, Senior Associate, Available Light

"I finally have been able to get CueServers into our projects and I wish I had used them from the beginning."
        - Glenn Bowman, Focused Design

"I just wanted to reiterate the respect I have for Interactive and its products. I think the CueServer is one of the best architectural controllers on the market, it is by far, the easiest to use and integrate into a fully networked system."
        - Larry Zoll, Sensory Interactive

"The CueServer performed flawlessly… Triggered RF relays for lights, contactors for the Boardwalk lights and played back two DMX streams, along with serial triggers for the video players and UDP commands for audio and the projectors! Truly a bad ass piece of hardware…"
        - Nick Hock, Image Engineering

"I have always enjoyed working with CueServer as no matter what the client throws at me I know the product can perform, adapt or interface to ensure the clients needs becomes a reality"
        - Darren Irving, LIDA Industries

"This is the only controller we will specify and install. Well made, great customer service and friendly to program" - Alan Smith, Paragon Productions

"Let me first complement you on a very fine product. From what I have seen so far, combined with feedback from other staff it's impressive."
        - Shaun Johnson, Johnson Systems

DIN Enclosures
Professional Installation Accessories

Interfaces & Accessories
The little things that make a difference

Interactive Technologies offers two sizes of NEMA Type 1 enclosures suitable for mounting DIN Rail devices. Designed to compliment our family of CueServers and related accessories, the easy to use, flexible, and contractor friendly DIN Enclosures will add a professional finish to permanent installations.

*Example **DE-1612** with (1) **CS-940**, (2) **IT-SP8D** splitters, Ethernet switch, and High Voltage Barrier installed*

Features At A Glance

- Indoor enclosure for lighting controls and related components
- Rigid spot welded steel construction
- Available in two sizes
- DIN Rail and associated hardware for custom designs included
- Hinged steel door with quarter turn latch closure (locking kit optional)
- Removable high voltage barrier adhering to electrical code is provided
- Removable 16 gauge perforated inner panel for custom component layout
- Finished with ANSI 61 gray powder coating
- **Standards:**

  UL 50 Type 1 and CSA Type 1 listings

  Complies with NEMA Type 1, IEC 60529, IP20

Small Enclosure
